## Schedule of Largest Purchases and Sales

There is no cost involved in the purchase of the derivatives. A margin or premium is paid to set up the contract and inflows and outflows are paid and received based on the market value until the maturity date arises or the derivative is sold out. As a result of this no schedule of largest purchases and sales are included in the financial statements.

### **Background to the Company**

Enovara Plc (the "Company") is structured as an open-ended investment company with variable capital, structured as an umbrella fund with segregated liability between Sub-Funds and incorporated under the laws of Ireland on 8 August 2005 as a public limited company pursuant to the Companies Acts, 1963 to 2009. The Company has been authorised by the Irish Central Bank (the "Central Bank") pursuant to the provisions of the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011.

As an umbrella fund with segregated liability between Sub-Funds, the Company may create different Sub-Funds from time to time. There are currently shares of seven Sub-Funds in issue, the Global Emerging Markets III 80% Protected Fund, the S&P Diversified Trends Indicator Fund, the S&P Diversified Trends Indicator 80% Protected Fund, the RQSI Global Asset Allocation Fund, the Nomura Balanced Index Fund, the Flex Europe Index Linked Fund and the HFRq UCITS III Fund (individually the "Fund", collectively the "Funds").

#### **Investment Objective**

### Global Emerging Markets III 80% Protected Fund ("GEM III Fund")

The investment objective of the GEM III Fund is to provide Shareholders of each class with a return representing the performance of the Global Emerging Markets III 80% Protected Portfolio (the Reference Asset), denominated in the currency of the relevant Share Class (after accounting for certain fees and expenses). The Reference Asset consisted of a Reserve Asset, being cash in the currency of the relevant Share Class and an Underlying Asset, being Units of the Nomura Global Emerging Markets Index ("NGEM Index").

## S&P Diversified Trends Indicator Fund ("S&P DTI Fund")

The investment objective of the S&P DTI Fund is to provide Shareholders of each class with a return representing the performance of the S&P Diversified Trends Indicator Tracker Series (the Reference Asset), denominated in the currency of the relevant Share Class, subject to certain fees and expenses. The Reference Asset is a globally diversified basket of 24 highly liquid commodity and financial futures, equally weighted between commodities and financial futures.

### S&P Diversified Trends Indicator 80% Protected Fund ("S&P DTI (80%) Fund")

The investment objective of the S&P DTI (80%) Fund is to provide Shareholders of each class with a return representing the performance of the S&P Diversified Trends Indicator 80% Protected Portfolio (the Reference Asset), denominated in the currency of the relevant Share Class, subject to certain fees and expenses. The Reference Asset comprises of 5 notional portfolios, each consisting of a Reserve Asset, being cash in the currency of the relevant Share Class, and an Underlying Asset, being Units of the S&P Diversified Trends Indicator Tracker Series.

#### RQSI Global Asset Allocation Fund ("RQSI GAA Fund")

The investment objective of the RQSI GAA Fund is to provide Shareholders of each class with a return representing the performance of the Nomura RQSI GAA Index (the Reference Asset), denominated in the currency of the relevant Share Class, subject to certain fees and expenses. This is achieved by gaining exposure to the Nomura RQSI GAA Index, which represents futures contracts selected and maintained by Nomura International plc in order to provide a dynamic and systematic method of participating across the following asset classes: global equities, global fixed income, commodities and currencies which are selected on the basis of econometric and technical assessment and their fundamental and relative value.

#### Nomura Balanced Index Fund ("Balanced Index Fund") - launched on 7 May 2010

The investment objective of the Balanced Index Fund is to provide Shareholders of each class with a return linked to the performance of a variety of asset classes, including equities, commodities, real estate and bonds. This is achieved by gaining exposure to the Nomura EUR Balanced Index (the Index), denominated in the currency of the relevant Share Class, subject to certain fees and expenses. The Index aims to deliver the performance of a systematic allocation across the following asset classes: developed market equities, emerging market equities, commodities, real estate, sovereign bonds and investment grade corporate bonds. Each month the Index aims to construct an optimum portfolio from the investment opportunity set offered by these asset classes. The Index's exposure to each asset class is achieved via exchange traded contracts or securities.

## Flex Europe Index Linked Fund ("Flex EIL Fund") – launched on 30 July 2010

The investment objective of the Flex EIL Fund is to provide Shareholders of each class with a return representing the performance of the Nomura Flex Europe Index (the Reference Asset), denominated in Euro the currency of the relevant Share Class, subject to certain fees and expenses. The Index aims to significantly outperform a direct

## Background to the Company (continued)

## **Investment Objective (continued)**

investment in the European equity market in the long term and is designed to capture positive performance of the market, while aiming to protect potential gains during market downturns. The Index aims to achieve this by following a strategy which dynamically rebalances between equity and money markets according to a transparent, quantitative mechanism dependent on the momentum and volatility of the underlying equity market.

## HFRq UCITS III Fund ("HFRq Fund") – launched on 5 August 2010

The investment objective of the HFRq Fund is to provide Shareholders of each class with a return linked to the performance of the HFRq UCITS III Index (the Index) which represents long and short futures contracts (together, the "Index Components") on global equities, commodities, currencies, global fixed income and volatility, selected and maintained by Hedge Fund Research, Inc (the "Index Sponsor"). This is achieved by gaining exposure to the Index, denominated in the currency of the relevant Share Class, subject to certain fees and expenses. The Index Components are selected on the basis of an algorithmic and rules-based index methodology in order to seek to achieve a high correlation to the performance of the HFRi Fund Weighted Composite Index [which reflects the performance of a diversified pool of hedge funds]. The Index is calculated by the Index Sponsor and is calculated and published in US Dollars.

## **Investment Policy of each of the Funds**

In order to achieve the above investment objectives, the Company, on behalf of the Funds intends to invest the net proceeds of any issue of Shares (whether on the initial issue date or subsequently) in Funds Assets. Such Funds Assets may include Debt Securities which may include but not be limited to government and corporate bonds and notes (fixed and floating interest rate), commercial paper, asset backed securities and mortgage backed securities, each listed or traded on a stock exchange or market rated "investment grade" by Standard & Poor's and/or Moody's or, if unrated, determined to be of equivalent credit quality by the Investment Manager.

In addition, the Company on behalf of each Fund will enter into one or more Derivative Contracts with one or more Approved Counterparties, which are expected, in most cases, to be Nomura International Plc and/or Nomura Bank International Plc. Such Derivative Contracts will include but not be limited to swaps, futures and options entered into with Approved Counterparties. It is intended that each Fund will enter into separate Derivative Contracts in respect of each Share Class in order to provide Shareholders of each class with a return, and with respect to certain Funds, with protection which is equal to that stated in the relevant Supplement.

There may be one or more Derivative Contracts, each of which will either expose the Fund to the performance of Debt Securities or to the performance of the relevant Reference Asset, in each case in exchange for the Fund paying the value and/or all or part of the income of the Fund Assets to the Approved Counterparties.

The acquisition of and/or entry into the Funds Assets by the Company will be determined by the Investment Manager. The Net Asset Value per Share of a Fund will be calculated by dividing the Net Asset Value of the Fund by the number of Shares in the Fund then in issue or deemed to be in issue as at the Valuation Point for such Dealing Day and rounding the result mathematically to two decimal places or such other number of decimal places as may be determined by the Directors from time to time.

## **Calculation of Net Asset Value per Share**

The Valuation Points for each of the GEM III, S&P DTI and S&P DTI (80%) Funds refers to the close of business in Dublin on each Dealing Day, for the RQSI GAA Fund refers to 4pm in Chicago on each Dealing Day, for the Balanced Index Fund refers to 4.15pm US Eastern time on each Dealing Day, for the Flex EIL Fund refers to 4.35pm Dublin time on each Dealing Day and HFRq Fund refers to 4pm in New York on each Dealing Day. Dealing Day has the meaning set out in the relevant Supplement for each Fund and is any business day on which, amongst others, commercial banks and foreign exchange markets are open and settle payments (including dealings in foreign exchange and foreign currency deposits) in one or more of Chicago, Dublin, London, Luxembourg, New York, Oslo, Tokyo, Stockholm, Target 2 and Zurich (as specified in the relevant supplement).

## **Background to the Company (continued)**

## Calculation of Net Asset Value per Share (continued)

The Net Asset Value per Share will differ on each Dealing Day as: (a) the value of the Derivative Contracts will increase or decrease over time by reference to the performance of the Global Emerging Markets III 80% Protected Fund, S&P Diversified Trends Indicator Fund, S&P Diversified Trends Indicator 80% Protected Fund, RQSI Global Asset Allocation Fund, Balanced Index Fund, Flex EIL Fund and HFRq Fund as applicable; and (b) the value of the Fund's assets will be affected over time by a variety of factors including, amongst others, market risks, credit quality, corporate actions, macro economic factors, including without limitation Sterling, Euro, US Dollar, Swiss Franc, Norwegian Krone, Japanese Yen and Swedish Krona (as applicable) interest rate movements, and speculation.

## **Investment Manager's Report**

## Global Emerging Markets III 80% Protected Fund (GEM III Fund)

## **Emerging Markets Performance**

Global emerging markets had a positive performance for the year ending 31 March 2011, supported by strong fund inflows, higher emerging market currencies, robust economic activity and higher commodity prices.

For the first quarter of 2011, Emerging Markets were flat to positive with the MSCI Emerging Market Index increasing by 1.7% during the period. This was largely due to the positive performance in the later half of March following the fall in Emerging Markets in the first 2 months of year on the back of rising worries about inflation and the geopolitical situation in the Middle East and North Africa.

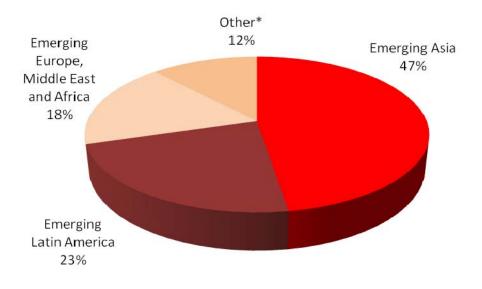

Latin American markets and Russia were among the top performers on the back of strong commodity prices and domestic currency appreciation. Markets in Emerging Asia performed well also on the back of strong exports and consumption demand.

China's Gross Domestic Product (GDP) growth eased during the period, mainly due to the government's efforts to contain inflation. The people's bank of China raised the reserve requirement for banks and interest rates multiple times in an effort to curb inflation that reached its highest level in almost 2 years.

The Indian economy grew 8.9% year on year exceeding market expectations, this was supported by strong manufacturing and construction growth.

The Brazilian economy eased during the year on the removal of stimulus measures. The growth was mainly driven by consumption as investment and government expenditure slowed down.

The regional allocation of the NGEM Index (based on publicly available information as at 31 March 2011) was:

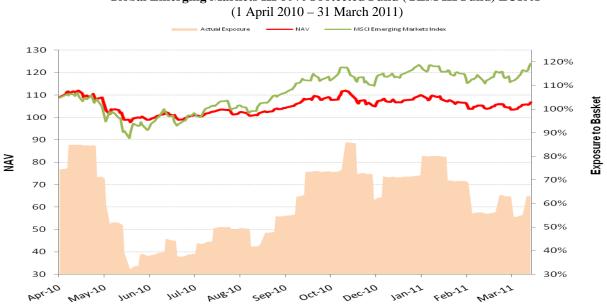

\* Cash, ETF's and other non emerging equity regions.

## **GEM III Fund Performance - EUR A Share Class**

Launched on 29 July 2009, the GEM III Fund was struck at an initial issue NAV of 100 on the 12 August 2009. The Fund has returned a negative performance of -1.83% (EUR A Share Class) for the 12 months to 31 March 2011. The 80% protected level remained constant at 92.43 (EUR A Share Class) during the period and it means that existing and future investors are guaranteed at least this level on sale. The Fund's exposure to the emerging markets index was on an average 60% as the Fund exposure had to be reduced after periods of market sell-offs in order to ensure that investors at least receive the 80% protected level.

## **Investment Manager's Report (continued)**

## GEM III Fund Performance - EUR A Share Class (continued)

## Global Emerging Markets III 80% Protected Fund (GEM III Fund) EUR A

The returns analysis of the GEM III Fund over the period is set out below:

| Performance – EUR A Share Class        |            |
|--|------------|
| 1 month return                         | 2.42%      |
| 3 month return                         | -1.76%     |
| 1 year return                          | -1.83%     |
| Return since inception (annualised)    | 4.09%      |
| Lock-in Level                          | 92.43      |
| Risk Analysis – EUR A Share Class      |            |
| Annualised volatility                  | 12.23%     |
| Assets Under Management – GEM III Fund |            |
| Fund AUM (Base Currency)               | USD 63.42M |

Investors should note that the performance of other share classes in the GEM III Fund will vary from the figures for the EUR A Share Class given above.

## Outlook

We believe emerging markets continue to be in a long-term, upward-moving phase, and we expect this trend to continue in the next 12 months. Even more money is likely to be directed into these markets as investors around the world realise that emerging economies on average are growing at a stronger pace than developed economies and generally have more foreign reserves and lower debt-to-GDP ratios than their developed counterparts. In addition to robust macroeconomic data, financial and fiscal indicators remain positive. Moreover, the search for higher returns in a low interest rate environment coupled with attractive valuations in emerging markets is likely to continue to support equity prices. The main challenge for policymakers in the emerging economies, in contrast to the developed world, is to manage the inflationary pressures associated with economic growth as this has potential to cause sharp sell-offs along the way. However, short-term volatility may provide investors with attractive entry levels, as over the longer term, emerging markets should reflect the underlying strong economic growth in those countries.

6 April 2011

## **Investment Manager's Report (continued)**

## S&P Diversified Trends Indicator Fund (S&P DTI Fund) and S&P Diversified Trends Indicator 80% Protected Fund (S&P DTI (80%) Fund)

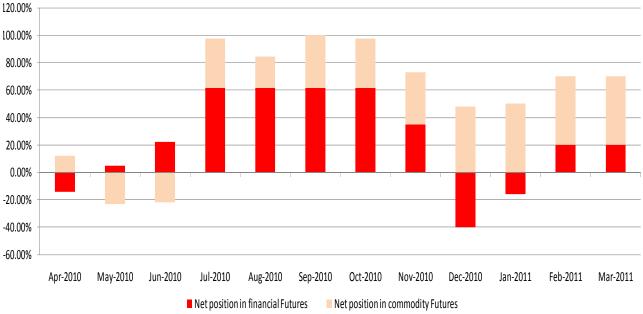

## S&P DTI Tracker Series<sup>1</sup> Performance

The S&P DTI is an "indicator" which implies and suggests the short-term direction of markets. The performance of the S&P DTI is determined by the commodities and financial futures markets. The indicator generated a +2.90% return for the year ended on 31 March 2011. It was a year of two halves with the indicator posting a negative performance of -5.83% for the first half of the year before recovering in the second half on the back of strong long bias on commodities.

During the first half of the year the S&P DTI poised itself for a slow recovery in 2010 with a jobless growth. As a result it was short on industrial metals and grains for most of the period, long on precious metals and short on low yielding currencies. With markets pricing based on future inflation expectations, commodities for most of the period posted a positive performance and currencies like the Yen moved higher resulting in a negative performance for the S&P DTI.

In late August the Federal Reserve started the second round of quantitative easing to stimulate the economy. This along with more temporary spending and tax cuts resulted in the market anticipating higher inflation. With increasing expectations of inflation, the S&P DTI switched its bias to long commodities during the later half of the year and benefitted from these positions with energy, grains, precious and industrial metals being the standout performers for the second half of the year.

During quarter 1 of 2011 the geopolitical situation in the Middle East and North Africa pushed crude oil prices higher and the long position in energy helped the S&P DTI to absorb the market shock due to the earthquake in Japan.

S&P Diversified Trends Indicator Tracker Series (underlying asset) – monthly positions for April 2010 to March 2011

Source: Nomura International plc

## S&P DTI Fund Performance - EUR A Share Class

The S&P DTI Fund recorded a positive performance of 0.76% (EUR A Share Class) for the year ended 31 March 2011. The Fund started the period with a NAV of EUR 100.36 (EUR A Share Class), finishing with a NAV of EUR 101.12.

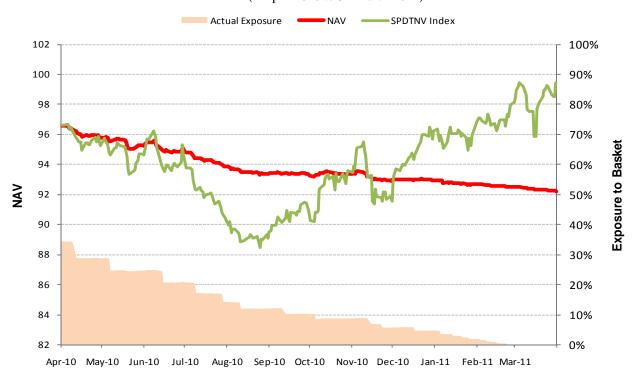

<sup>&</sup>lt;sup>1</sup> S&P DTI Tracker Series (Bloomberg ticker SPDTNV <Index>) is calculated by Standard & Poor's and reflects the performance of an investment in the S&P DTI Total Return and assumes a charge of 1.25% annually in total fees.

## **Investment Manager's Report (continued)**

## S&P DTI Fund Performance - EUR A Share Class (continued)

The S&P DTI Fund tracked, but lagged behind the performance of the underlying Index throughout the period. The Grains sector had the biggest detrimental impact on the Fund with the Index carrying short positions when low stockpiles and reduced global output due to extreme weather conditions in Canada and Russia led to an increase in Grain prices. The Fund also suffered from short positions in copper while it rallied almost 10% in July.

In the Financials half of the index, performance was better but not enough to compensate for the commodity losses. In particular the Fund made strong gains in its positions in US Bonds and Notes futures. The Fund made gains in its short position in the Euro in the first three months of the period but lost these gains as the US Dollar weakened. There were strong gains in long Japanese Yen positions held by the Fund. The Fund recovered these losses in the second half of the financial year as there was a rebound in the S&P DTI.

S&P Diversified Trends Indicator Fund (S&P DTI Fund) EUR A (1 April 2010 to 31 March 2011)

The returns analysis of the S&P DTI Fund over the period is set out below:

| Performance – EUR A Share Class        |             |
|--|-------------|
| 1 month return                         | 1.13%       |
| 3 month return                         | 3.43%       |
| 6 month return                         | 8.13%       |
| 1 year return                          | 0.76%       |
| Return since inception (annualised)    | 0.26%       |
| Risk Analysis – EUR A Share Class      |             |
| Annualised volatility                  | 7.92%       |
| Assets Under Management – S&P DTI Fund |             |
| Fund AUM (Base Currency)               | USD 106.74M |

Investors should note that the performance of other share classes in the S&P DTI Fund will vary from the figures for the EUR A Share Class given above.

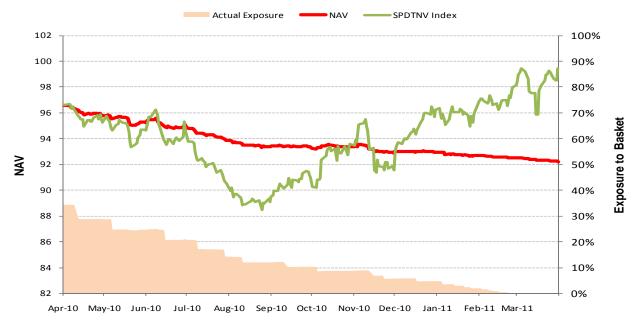

## **Investment Manager's Report (continued)**

## S&P DTI (80%) Fund Performance - EUR A Share Class

The S&P DTI 80% Protected Fund recorded a negative performance of -4.54% (EUR A Share Class) for the year ended 31 March 2011. The Fund started the period with a NAV of EUR 96.58 (EUR A Share Class), finishing with a NAV of EUR 92.20.

The Fund lagged behind the performance of the underlying Index throughout 2010 as the exposure to the underlying Index remained low and reached very close to 0% as the Funds exposure was reduced to ensure that shareholders at least receive the 80% protected NAV level. The performance of the S&P DTI 80% Protected Fund was less volatile than the S&P DTI Index itself, or indeed the S&P DTI Fund, on account of the protection feature. The exposure level is now close to zero and the NAV of the Fund is not expected to fluctuate in the future, remaining around the 80% protected level.

S&P Diversified Trends Indicator 80% Protected Fund (S&P DTI 80% Fund) EUR A (1 April 2010 to 31 March 2011)

The returns analysis of the S&P DTI (80%) Fund over the period is set out below:

| Performance – EUR A Share Class              |           |
|--|-----------|
| 1 month return                               | -0.10%    |
| 3 month return                               | -0.64%    |
| 6 month return                               | -1.18%    |
| 1 year return                                | -4.47%    |
| Return since launch date (annualised)        | -1.86 %   |
| Lock-in Level                                | 92.128    |
| Risk Analysis – EUR A Share Class            |           |
| Annualised volatility                        | 6.60%     |
| Assets Under Management – S&P DTI (80%) Fund |           |
| Fund AUM (Base Currency)                     | USD 6.67m |

Investors should note that the performance of other share classes in the S&P DTI (80%) Fund will vary from the figures for the EUR A Share Class given above.

## **Investment Manager's Report (continued)**

## **S&P DTI Funds (continued)**

## Outlook

S&P DTI continue its long bias for commodities with a view to take advantage of market adjustments in order to price in impending inflation and remain decisively short on US Bonds and Notes.

The geopolitical situation in the Middle East and North Africa is bullish for energy but the aggravating political situation in the region has potential to derail the rebound in economic growth, hence causing stagflation worries for the market. This coupled with the worsening fiscal situation in the EU are the potential risk factors for S&P DTI performance going forward.

6 April 2011

## **Investment Manager's Report (continued)**

## **RQSI** Global Asset Allocation Fund (RQSI GAA Fund)

## Performance of the RQSI GAA Fund

The Nomura RQSI GAA Index (the "Index") aims to provide a dynamic and systematic method of participation in four asset classes (global equities, global fixed income, commodities and currencies) via futures contracts which are selected on the basis of econometric and technical assessment and their fundamental and relative value.

The RQSI GAA Index posted a gain of 10.56% for the year ended 31 March 2011. The four asset classes contributed to this performance as follows:

**Global Equities** – The contribution to the RQSI GAA Index was negative from Global Equities in a relatively strong period for global equities with the MSCI Global index up over 10%. The negative Index contribution, despite the Index having a long bias to equities for most of the year, was due to timing issues.

The Index had a large long weighing in late April / early May to Global Equities during a major market sell-off which hit all markets, but resulted in especially significant losses in ASX (Advanced Semiconductor Engineering). After this sell-off the Index reduced its long exposure until gradually ramping up exposure beginning in quarter 4. The timing of these exposure changes resulted in the Index suffering from the mid-year sell-offs with large exposures in place and not capturing as much upside from the rallies.

**Global Fixed Income** – Returns contribution to the Index for the period were positive from Global Fixed Income as the bond market rallied very strongly through the end of quarter 3 until experiencing a major pullback in quarter 4. Investors were attracted to the aggressive action of global governments that kept rates "artificially" low throughout the yield curve resulting in major price gains in bonds. US Thirty Year and Ten Year government bonds yields declined to 2010 low levels of 3.5% and 2.4% after beginning the year at 4.8% and 3.7% respectively. After reaching annual lows, yields "rocketed" almost 1% in quarter 4 as investors began to believe that global economies were seeing a real recovery and concerns about quarter 2 stimulated inflation increased.

The Index maintained a long exposure throughout September 2010 at which point the Index exposure experienced fairly dynamic changes ending the year at almost its smallest exposure for the year. Although the Index did reduce exposure significantly late in the year, the Index suffered losses due to the steep decline in bond prices during the period between October and December 2010.

**Commodities** – Returns contribution to the Index for 2010 were positive for commodities as the Reuters-CRB Index (CRB) posted strong gains in the period. Almost mirroring the equity markets, the CRB was down through the end of August 2010 until staging a rally from September to December. All sectors posted solid gains for the 12 month period led by the strongest performance in grain and precious metals. At Index level, the Index had its largest gains in long positions in grains and short position in natural gas with losses from short positions in sugar, silver and wheat, making up the largest losses.

**Currencies** – Returns contribution to the Index were positive for currency in a period marked by choppiness in the US Dollar which was up 1% for the year. Masking this small net change were major intra-year moves highlighted by a 12% rally in the Dollar Index through end of May on major concerns about European stability, a subsequent 15% sell-off through to the end of October and a mini-rally and sell-off in November and December to end the year basically unchanged.

At the individual currencies level, returns showed reasonable divergence with the low yielding Japanese Yen and high yielding Australian dollar both gaining through the period with the Euro and British pound down on concerns about the European economy. The Index weightings were remarkably dynamic adjusting to market sentiments on dollar positions with the largest long dollar weighting in June, its largest short dollar exposure on 14 September and experiencing a rapid shift from short dollar to long dollar and then back again by the end of 2010.

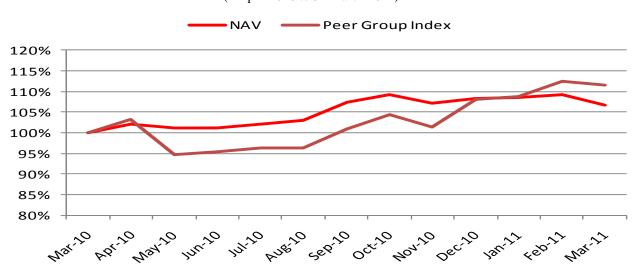

### **Investment Manager's Report (continued)**

#### **RQSI** Global Asset Allocation Fund (continued)

#### **Fund Performance**

The RQSI Global Asset Allocation Fund recorded a positive performance of 5.65% (EUR A Share Class) for the year ended 31 March 2011.

The RQSI GAA Index was up 10.56% for the 12 months period ending 31 March 2011. The Index made solid gains in Global Fixed Income and Currencies. The Index kept long exposure in bonds for the first 6 months and switched back to short during the later half of the year and was able to capture the movements in the first quarter of 2011. The Index was able to capture the trends in currencies and made notable gains in short Euro position in April-June 2010 and short dollar positions in June-September 2010. The RQSI GAA Fund was also able to consistently outperform the Peer Group Index\* for most of the period after which it lagged behind the Index as CTA's had a strong performance in December 2010 on the back of strong positive performance in commodities.

**RQSI Global Asset Allocation Fund (RQSI GAA Fund) EUR A\*** (1 April 2010 to 31 March 2011)

The Peer Group Index is a hypothetical index based on an equally weighted basket of 5 well established CTA Funds. It is intended to show the performance of the RQSI GAA Fund in the context of the CTA market generally.

\* Base value of 100% as at 31 March 2010.

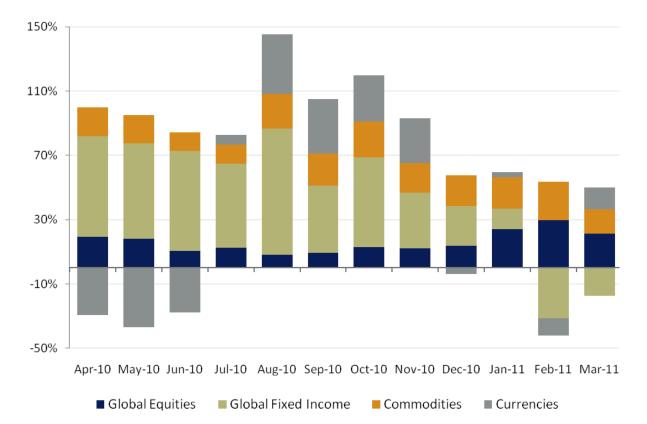

The returns analysis of the RQSI GAA Fund over the period is set out below:

| Performance – EUR A Share Class         |             |
|---|-------------|
| 1 month return                          | -2.44%      |
| 3 month return                          | -1.92%      |
| 6 month return                          | -1.29%      |
| 1 year return                           | 5.65%       |
| Return since launch date (annualised)   | 3.94%       |
| Risk Analysis – EUR A Share Class       |             |
| Annualised volatility                   | 6.10%       |
| Assets Under Management – RQSI GAA Fund |             |
| Fund AUM (Base Currency)                | USD 128.57m |

Investors should note that the performance of other share classes in the RQSI GAA Fund will vary from the figures for the EUR A Share Class given above.

Investment Manager's Report (continued)

**RQSI** Global Asset Allocation Fund (continued)

Fund Performance (continued)

This chart shows the Monthly Average Net Exposure of the RQSI GAA Fund to each of the four asset classes within the RQSI GAA Index. A positive figure denotes that the Index was on average, positioned long in that particular asset class for the month, a negative figure denotes that the Index was on average, positioned short in that particular asset class over the month. A Monthly Average Net Exposure of more than 100% shows that the Index was on average leveraged over the month.

## Outlook

The markets are reverting to a risk seeking mode after the events in Japan and the geopolitical situation lead to risk aversion for the most part of quarter 1, 2011. At present equity and commodity markets are adjusting with a view to price in the revival in economic growth and inflation expectations.

However, the political situation in the Middle East and worsening fiscal situation in developed markets remain key risks and have potential to derail this rally.

At this point having a directional position in most of the asset classes is not without its risks and the ability of Index exposure to change in line with changes in investor risk appetite will be key to the performance of the RQSI GAA Fund in 2011.

## Investment Manager's Report (continued)

### Nomura Balanced Index Fund (Balanced Index Fund)

### Performance of the Balanced Index Fund

The Nomura Balanced Index Fund (the "Fund") was approved by the Central Bank on 11 March 2010 and became exposed to the underlying index, Nomura EUR Balanced Index ("Index") on 7 May 2010. Hence this commentary covers the period from 7 May 2010 to the year end, 31 March 2011.

The Index had an average exposure of 70% through the period to equities and commodities and hence was exposed to the drawdowns in risky assets during May-June 2010 and quarter 1, 2011 but was almost flat for the period as equities and commodities had strong positive performance during the period.

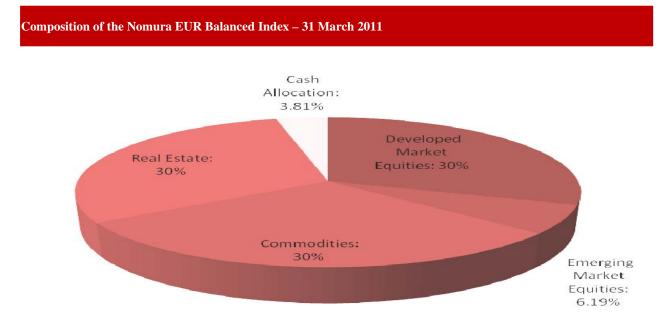

Sovereign and investment grade corporate bonds returned moderate negative performance in quarter 2 after which the Index was no longer exposed to them.

During quarter 1, 2011 the Index moved in sync with the investor risk appetite for equities and commodities and hence was exposed to risk aversion after the earthquake and nuclear disaster in Japan but rebounded in line with the pull back in equities and commodities towards the end of the quarter.

Both developed and emerging market equities had a strong positive performance during the period though market performance varied widely as European and Japanese Equity markets lagged the US and Emerging Markets. This resulted in almost a flat contribution from equities to the Index.

Commodities retreated initially on worries about a "double dip" in developed market economies during June 2010 but pulled back smartly to have a strong positive performance for the period. The Index had an average exposure of 12% to commodities for the period and benefitted from the positive performance.

The Index benefitted from its exposure to sovereign and investment grade corporate bonds during quarter 2, 2010 but the exposure was reduced in early quarter 3, 2010 as the global yields pulled up leading to a decline in bond prices. The Index had an average exposure of 15% for the period.

Source: Nomura International plc. The data is compiled using the most recent publicly available data based on sources we believe to be reliable, however we do not represent that it is accurate or complete.

## **Investment Manager's Report (continued)**

## Nomura Balanced Index Fund (continued)

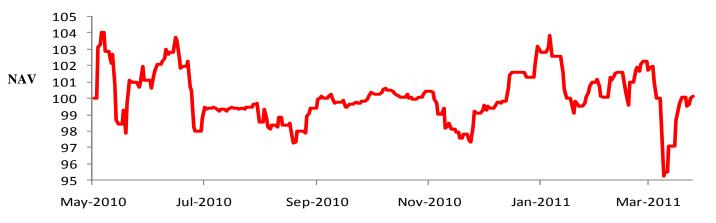

## **Fund Performance**

The Nomura Balanced Index Fund was approved by the Central Bank on 11 March 2010 and made a return of 0.15% (EUR A Share Class) in the period ending 31 March 2011.

The flat performance of the Fund can be explained by the mixed performance of the Index during the period. During the first 3 months of launch the Index suffered from unfortunate timing issues as it switched exposure from equities and commodities to fixed income assets after a June sell off and was exposed to retraction in global bond prices.

Henceforth, the Index was weighted more towards risky assets and hence was exposed to the volatile performance of these assets evident in the drawdown in November 2010 and a sharp pullback in December 2010.

(inception to 31 March 2011)

Source: Nomura International plc, based on data provided by Bloomberg. All performance data is calculated in EUR. The above performance should in no way be construed as a projection of future returns.

The returns analysis of the Balanced Index Fund over the period is set out below:

| Performance – EUR A Share Class               |            |
|---|------------|
| 1 month return                                | -1.52%     |
| 3 month return                                | -1.12%     |
| 6 month return                                | 0.43%      |
| Return since launch date (annualised)         | 0.17%      |
| Risk Analysis – EUR A Share Class             |            |
| Annualised volatility                         | 10.15%     |
| Assets Under Management – Balanced Index Fund |            |
| Fund AUM (Base Currency)                      | EUR 17.06m |

Investors should note that the performance of other share classes in the Balanced Index Fund will vary from the figures for the EUR A Share Class given above.

### **Investment Manager's Report (continued)**

## Nomura Balanced Index Fund (continued)

## Outlook

The Nomura EUR Balanced Index starts the period with majority of its weight concentrated in developed market equities, real estate and commodities. With markets pricing in higher inflation expectations and a revival in economic growth in developed equity markets these allocations should help the Index in generating a positive performance for next quarter.

We believe that the Fiscal situation in peripheral countries in Europe, the geopolitical situation in the Middle East and North Africa and the risk of stagflation because of high energy prices remain potential risk factor to the Index performance in the next quarter.

6 April 2011

### **Investment Manager's Report (continued)**

#### Flex Europe Index Linked Fund (Flex EIL Fund)

#### Performance of the Flex EIL Fund

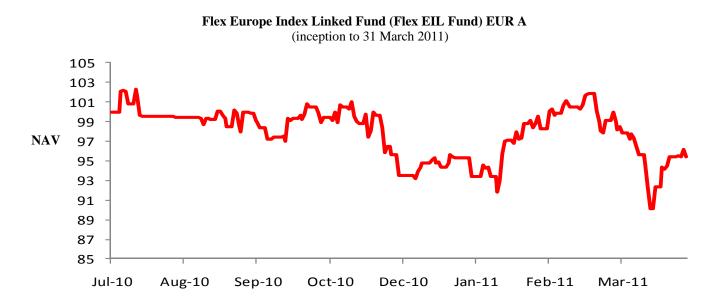

The Flex Europe Index Linked Fund (the "Fund") was approved by the Central Bank on 28 July 2010 and became exposed to the underlying index, Nomura Flex Europe Total Return Index (the "Index") on 30 July 2010. Hence this commentary covers the period from 30 July 2010 to the year end, 31 March 2011.

The Index had a negative performance of -3.22% during the period while the Market asset for the Index i.e. the EuroStoxx 50 Total Return Index ("Eurostoxx 50 TR") posted a positive performance of 7.13% during the period. The divergence in Index performance and performance of the Market Asset was the result of the Market Asset being volatile as concern over sovereign debt, and potential problems within continental banks, weighed heavily on European equities. In 2010, for the first time since the euro's inception in 1999, its very survival was being seriously questioned as peripheral members such as Portugal, Ireland, Italy, Greece and Spain struggled with stagnant economies and apparently unsustainable levels of sovereign debt. Long-standing doubts about the one-size-fits-all monetary policy, and concerns over the lack of fiscal convergence, rose to the fore. However, the €750bn IMF/EU package announced in May, as well as significant loan packages to Ireland, helped to quell these fears. Such measures showed that politicians were committed to ensuring the survival of the euro area. As a result, European equities were able to advance overall, rising particularly sharply in December as an improving global economic outlook bolstered investor confidence.

#### **Fund Performance**

The Flex Europe Index Linked Fund recorded a negative performance of -4.59% since inception.

The negative performance of the Fund can be attributed to negative Index performance. The Index was not able to capture the sharp rebound in equity prices as it reduced its exposure to Market Assets during sell-offs and due to conflicting signals could not adjust the exposure quickly enough to capture sharp rebounds. Nevertheless, the Index was able to protect the Fund during period of market downturns.

Source: Nomura International plc, based on data provided by Bloomberg. All performance data is calculated in EUR. The above performance should in no way be construed as a projection of future returns.

## **Investment Manager's Report (continued)**

## Flex Europe Index Linked Fund (continued)

## Fund Performance (continued)

The returns analysis of the Flex EIL Fund over the period is set out below:

| Performance – EUR A Share Class         |           |
|---|-----------|
| 1 month return                          | -4.59%    |
| 3 month return                          | 2.16%     |
| Return since launch date                | -4.59%    |
| Return since launch date (annualised)   | -6.79%    |
| Risk Analysis – EUR A Share Class       |           |
| Annualised volatility                   | 14.52%    |
| Sharpe ratio                            | -0.51     |
| Assets Under Management – Flex EIL Fund |           |
| Fund AUM (Base Currency)                | EUR 9.57m |

Investors should note that the performance of other share classes in the Flex EIL Fund will vary from the figures for the EUR A Share Class given above.

## Outlook

The euro zone will certainly face further significant challenges going forward. Investors will be seeking reassurance that the authorities have the wherewithal to allow peripheral members to overcome their short-term financing difficulties. In addition, they will be expecting the introduction of measures that will allow the euro zone not just to survive but to flourish in the longer term.

We believe that the euro zone will continue to comprise a three-tier economy over the coming year and beyond. The fastest-growing group consists of Germany and the Nordic countries, which have strongly competitive economies and whose exports, bolstered by the weak euro, are fuelling growth. Meanwhile, the struggling peripheral economies, with high levels of sovereign debt and massive public sector deficits, populate the laggards whereas countries such as France, which lie in the middle, are benefiting from fiscal and economic stimulus.

6 April 2011

## **Investment Manager's Report (continued)**

## HFRq UCITS III Fund (HFRq Fund)

## Performance of the HFRq Fund

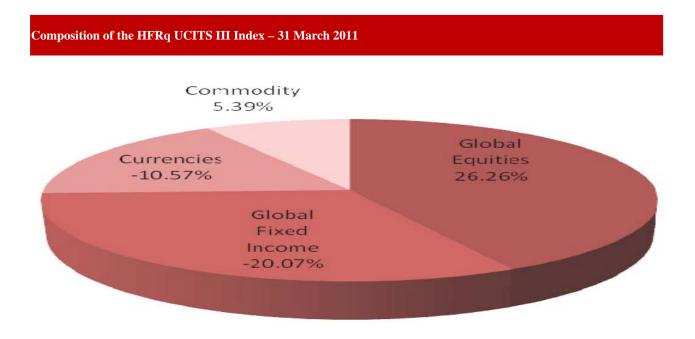

The HFRq UCITS III Fund (the "Fund") was approved by the Central Bank on 28 July 2010 and became exposed to the underlying index, HFRq UCITS III Index ("Index") on 5 August 2010. Hence this commentary covers the period from 5 August 2010 to the year end, 31 March 2011.

The HFRQ UCITS III Index (Index") posted a positive performance of +6.64% during the period. The Index followed a trend towards less risky exposures in quarter 3, 2010 and had a neutral equity market exposure with a small increase in fixed income exposure which had increased towards the end of quarter which was continued into quarter 4. The Index benefitted from high exposures to equities and commodities during the quarter.

Since the start of the year in response to increasing geopolitical risk, exposure to risky assets has been progressively reduced and switched to more protection seeking positions. This helped the Index in gaining a significant positive performance during quarter 1, 2011 and the Index was able to protect itself from global shocks.

The HFRI Fund Weighted Composite Index ("Benchmark") posted a positive return of 10.46% during the period and the Index achieved a high positive correlation of 92% to benchmark during the period.

The period was marked by a broad positive performance by all Hedge Fund strategies baring the short bias ones. HFRI Macro index was up +6%, HFRI Event Driven was up +10%. HFRI Fixed Income –Convertible Arbitrage was up +9.2% and HFRI Emerging Market was up +10%.

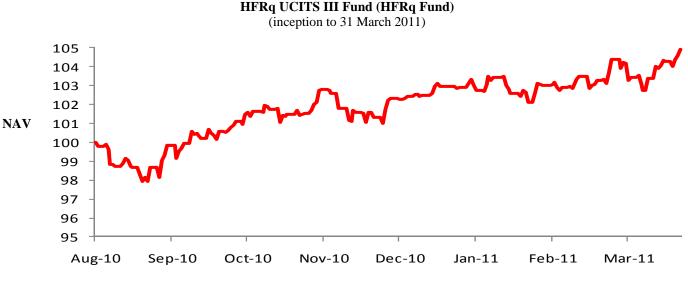

## Fund Performance

The HFRq UCITS III Fund was approved by the Central Bank on 28 July 2010 and became exposed to the HFRq UCITS III Index on 5 August 2010. Hence, the Fund Performance covers the period starting 5 August 2010 and ending on 31 March 2011. The Fund posted a positive performance of +4.90% (EUR A Share Class) during the period.

## **Investment Manager's Report (continued)**

## HFRq UCITS III Fund (continued)

The returns analysis of the HFRq Fund over the period is set out below:

| Performance – EUR A Share Class       |            |  |  |  |  |
|---------------------------------------|------------|--|--|--|--|
| 1 month return                        | 1.54%      |  |  |  |  |
| 3 month return                        | 1.96%      |  |  |  |  |
| Return since launch date              | 4.90%      |  |  |  |  |
| Return since launch date (annualised) | 7.61%      |  |  |  |  |
| Risk Analysis – EUR A Share Class     |            |  |  |  |  |
| Annualised volatility                 | 4.87%      |  |  |  |  |
| Assets Under Management – HFRq Fund   |            |  |  |  |  |
| Fund AUM (Base Currency)              | USD 19.58m |  |  |  |  |

Investors should note that the performance of other share classes in the HFRq Fund will vary from the figures for the EUR A Share Class given above.

#### Outlook

If we compare the performance of Hedge Fund Replicators during the period with Risky Asset Classes then they have moved in line with the positive performance of these asset classes except for quarter 1, 2011 when towards the end of January managers started moving their portfolios into a protection seeking mode and hence were able to absorb market shocks during early March. This performance was reflective of the ability of the hedge fund universe to benefit both from rising and falling markets.

The market environment looks optimistic with positive economic data from developed markets and strong growth in emerging markets. The commodities are looking attractive as markets are pricing in inflation expectations for future years. However, the possibility of higher energy prices on account of increased tensions in the Middle East as well as continual fiscal worries in Europe has potential to derail this scenario. Hence we expect this to be a year where the ability of managers to dynamically switch their exposures in line with the market environment will determine the success of hedge fund strategies. Historically, hedge fund strategies have typically done well in such periods due to their ability to capture both directional as well as sideways market movements.

6 April 2011

### Custodian's Report to the Shareholders of Enovara Plc

We have enquired into the conduct of Enovara Plc ("the Company") for the year ended 31 March 2011, in our capacity as Custodian to the Company.

This report including the opinion has been prepared for and solely for the shareholders in the Company as a body, in accordance with the Central Bank's UCITS Notice 4, and for no other purpose. We do not, in giving this opinion, accept or assume responsibility for any other purpose or to any other person to whom this report is shown.

### **Responsibilities of the Custodian**

Our duties and responsibilities are outlined in the Central Bank's UCITS Notice 4. One of those duties is to enquire into the conduct of the Company in each annual accounting period and report thereon to the shareholders.

Our report shall state whether, in our opinion, the Company has been managed in that period in accordance with the provisions of the Company's Memorandum and Articles of Association and the UCITS Regulations. It is the overall responsibility of the Company to comply with these provisions. If the Company has not so complied, we as Custodian must state why this is the case and outline the steps which we have taken to rectify the situation.

### **Basis of Custodian Opinion**

The Custodian conducts such reviews as it, in its reasonable opinion, considers necessary in order to comply with its duties as outlined in UCITS Notice 4 and to ensure that, in all material respects, the Company has been managed (i) in accordance with the limitations imposed on its investment and borrowing powers by the provisions of its constitutional documentation and the appropriate regulations and (ii) otherwise in accordance with the Company's constitutional documentation and the appropriate regulations.

#### Opinion

In our opinion, the Company has been managed during the year, in all material respects:

- (i) in accordance with the limitations imposed on the investment and borrowing powers of the Company by the Memorandum and Articles of Association and by the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2003, as amended, ('the Regulations'); and
- (ii) otherwise in accordance with the provisions of the Memorandum and Articles of Association and the Regulations.

State Street Custodial Services (Ireland) Limited 78 Sir John Rogerson's Quay Dublin 2 Ireland

Date: 13 July 2011

## **Directors' Report**

The Directors present herewith the annual report and audited financial statements for the year ended 31 March 2011.

### Statement of Directors' Responsibilities

The Directors are responsible for preparing the Annual Report and the Financial Statements in accordance with applicable Irish Law and Generally Accepted Accounting Practice in Ireland including the Accounting Standards issued by the Accounting Standards Board and published by the Institute of Chartered Accountants in Ireland.

Irish Company Law requires the Directors to prepare financial statements for each financial year which give a true and fair view of the state of affairs of the Company and of the profit or loss of the Company for that period. In preparing those financial statements, the Directors are required to:

- select suitable accounting policies and then apply them consistently;
- make judgements and estimates that are reasonable and prudent, and
- prepare the financial statements on the going concern basis unless it is inappropriate to presume that the Company will continue in business.

The Directors confirm that they have complied with the above requirements in preparing the financial statements.

The Directors are responsible for keeping proper accounting records which disclose with reasonable accuracy at any time the financial position of the Company and which enable them to ensure that the financial statements are prepared in accordance with the accounting standards generally accepted in Ireland and comply with the Irish Companies Acts, 1963 to 2009 and the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 (the "UCITS Regulations"). To this end, the Company has appointed State Street Fund Services (Ireland) Limited to provide it with fund accounting, administration and transfer agency services. The Directors are also responsible for safeguarding the assets of the Company and hence for taking reasonable steps for the prevention and detection of fraud and other irregularities. To this end, the Company has appointed State Street Custodial Services (Ireland) Limited as Custodian of its assets.

The measures taken by the Directors to ensure compliance with the Company's obligation to keep proper books of account are the use of appropriate systems and procedures and the appointment of competent persons. The books of account are held at 78 Sir John Rogerson's Quay, Dublin 2, Ireland.

## **Review of Business and Future Developments**

The Company has been approved by the Central Bank as an investment company pursuant to the European Communities (Undertaking for Collective Investment in Transferable Securities) Regulations, 2011.

The investment objectives and policies of the Company's Funds are outlined in the Background to the Company and the performance for each of the Funds is set out in the Investment Manager's Reports.

The Nomura Balanced Index Fund launched on 7 May 2010.

Mr. Reza Ghassemieh resigned as a Director of Enovara Plc on 27 May 2010.

Mr. Stephen Cohen was appointed as a Director of Enovara Plc on 27 May 2010 and resigned as Director on 13 July 2011. Mr. Cohen is an employee of Nomura International Plc.

The Flex Europe Index Linked Fund launched on 30 July 2010.

The HFRq UCITS III Fund launched on 5 August 2010.

The S&P DTI (80%) Fund SEK Retail Class was fully redeemed on 15 September 2010.

The Nomura Balanced Index 100% Guaranteed Fund (EUR) was approved by Central Bank on 21 December 2010 and the open offer period for same started on 3 February 2011. The Fund is expected to launch on 23 October 2011.

The RQSI Plus Global Asset Allocation Fund was approved by the Central Bank on 19 May 2011. The Initial Offer period for the Fund has been extended to 31 July 2011 and the proposed Initial Issue date for the Fund is 1 August 2011.

Effective 1 July 2011 Nomura Alternative Investment Management (Europe) Limited replaced Nomura International Plc as Investment Manager and Distributor to the Company.

The S&P DTI (80%) Fund is expected to terminate on 15 July 2011.

## **Directors' Report (continued)**

### **Risk Management Objectives and Policies**

Details of the Company's risk management objectives and policies are included in note 12 to the financial statements.

## Results

The results for the year are set out in the Profit and Loss Account.

## Directors

The Directors of the Company as at 31 March 2011 are set out below. All of the Directors have been Directors for the year unless otherwise stated.

Mr. Mike Kirby (Irish) Mr. Padraig McGowan (Irish) Mr. Paul McNaughton (Irish) Ms. Grazzia Horn (Italian) Mr. Stephen Cohen (British) (appointed 27 May 2010, resigned 13 July 2011)

The independent Directors of the Company are Mr. Mike Kirby, Mr. Padraig McGowan and Mr. Paul McNaughton.

All Directors are Non-executive Directors of the Company.

## **Directors' Interests**

The Board of Directors are not aware of any shareholding in the share capital of the Company by any Director during the year ended 31 March 2011, other than those noted below. The interests of the Directors in related parties are disclosed in note 11 of the financial statements.

## **Transactions Involving Directors**

Save in respect of Grazzia Horn holding one subscriber share of the Company, the Board of Directors is not aware of any contracts or arrangements of any significance in relation to the business of the Company in which the Directors or Company Secretary had any interest as defined in the Companies Act 1990 at any time during the year ended 31 March 2011 other than those already disclosed in note 11 of the financial statements.

## Employees

There were no employees of the Company through the year.

## **Independent Auditors**

The auditors, PricewaterhouseCoopers, will be re-appointed in accordance with Section 160(2) of the Companies Act, 1963.

## Subsequent Events

The RQSI Plus Global Asset Allocation Fund was approved by the Central Bank on 19 May 2011. The Initial Offer period for the Fund has been extended to 31 July 2011 and the proposed Initial Issue date for the Fund is 1 August 2011.

Effective 1 July 2011 Nomura Alternative Investment Management (Europe) Limited replaced Nomura International Plc as Investment Manager and Distributor to the Company.

Mr. Stephen Cohen resigned as a Director of Enovara Plc on 13 July 2011.

The S&P DTI (80%) Fund is expected to terminate on 15 July 2011.

ON BEHALF OF THE BOARD

PADRAIG McGOWAN

## MIKE KIRBY

Date: 13 July 2011

### Independent Auditors' report to the Shareholders of Enovara Plc (the "Company")

We have audited the Company's financial statements for the year ended 31 March 2011 which comprise the Balance Sheet, the Profit and Loss Account, the Statement of Changes in Net Assets Attributable to Redeemable Participating Shareholders, the Schedule of Investments and the related notes. These financial statements have been prepared under the accounting policies set out therein.

#### **Respective responsibilities of Directors and Auditors**

The Directors' responsibilities for preparing the Annual Report and the Financial Statements in accordance with applicable Irish law and the accounting standards issued by the Accounting Standards Board and published by the Institute of Chartered Accountants in Ireland (Generally Accepted Accounting Practice in Ireland) are set out in the Statement of Directors' Responsibilities.

Our responsibility is to audit the financial statements in accordance with relevant legal and regulatory requirements and International Standards on Auditing (UK and Ireland). This report, including the opinion, has been prepared for and only for the Company's Shareholders as a body in accordance with Section 193 of the Companies Act, 1990 and for no other purpose. We do not, in giving this opinion, accept or assume responsibility for any other purpose or to any other person to whom this report is shown or into whose hands it may come save where expressly agreed by our prior consent in writing.

We report to you our opinion as to whether the financial statements give a true and fair view in accordance with Generally Accepted Accounting Practice in Ireland, and are properly prepared in accordance with Irish statute comprising the Companies Acts, 1963 to 2009 and the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011. We state whether we have obtained all the information and explanations we consider necessary for the purposes of our audit, and whether the financial statements are in agreement with the books of account. We also report to you our opinion as to:

- whether the Company has kept proper books of account; and
- whether the Directors' report is consistent with the financial statements.

We also report to you if, in our opinion, any information specified by law regarding Directors' remuneration and Directors' transactions is not disclosed and where practicable, include such information in our report.

We read the other information contained in the Annual Report, and consider whether it is consistent with the audited financial statements. We consider the implications for our report if we become aware of any apparent misstatements or material inconsistencies with the financial statements. Our responsibilities do not extend to any other information.

#### **Basis of audit opinion**

We conducted our audit in accordance with International Standards on Auditing (UK and Ireland) issued by the Auditing Practices Board. An audit includes examination, on a test basis, of evidence relevant to the amounts and disclosures in the financial statements. It also includes an assessment of the significant estimates and judgements made by the Directors in the preparation of the financial statements, and of whether the accounting policies are appropriate to the Company's circumstances, consistently applied and adequately disclosed.

We planned and performed our audit so as to obtain all the information and explanations which we considered necessary in order to provide us with sufficient evidence to give reasonable assurance that the financial statements are free from material misstatement, whether caused by fraud or other irregularity or error. In forming our opinion we also evaluated the overall adequacy of the presentation of information in the financial statements.

## Opinion

In our opinion the financial statements:

• give a true and fair view in accordance with Generally Accepted Accounting Practice in Ireland, of the state of the Company's affairs at 31 March 2011 and of its results for the year then ended and

## Independent Auditors' report to the Shareholders of Enovara Plc (the "Company") (continued)

## **Opinion** (continued)

• have been properly prepared in accordance with the requirements of the Companies Acts, 1963 to 2009 and the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011.

We have obtained all the information and explanations we consider necessary for the purposes of our audit. In our opinion proper books of account have been kept by the Company. The Company's financial statements are in agreement with the books of account. In our opinion the information given in the Directors' report is consistent with the financial statements.

The accompanying notes are an integral part of these financial statements.

\*The Global Emerging Markets 80% Protected Portfolio Fund (GEM Fund) terminated on 15 December 2009.

\*\* The Global Emerging Markets III 80% Protected Fund (GEM III Fund) launched on 29 July 2009.

\*\*\* The RQSI Global Asset Allocation Fund (RQSI GAA Fund) launched on 28 September 2009.

### Notes to the Financial Statements for the year ended 31 March 2011

#### 1. Accounting Policies for the year ended 31 March 2011

The principal accounting policies and estimation techniques applied in the preparation of these financial statements are set out below. These policies have been consistently applied to all the years presented, unless otherwise stated.

#### **Basis of preparation**

The financial statements are prepared in accordance with accounting standards generally accepted in Ireland and Irish Statute comprising the Companies Acts, 1963 to 2009, and the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011. Accounting standards generally accepted in Ireland giving a true and fair view are those published by the Institute of Chartered Accountants in Ireland and issued by the Accounting Standards Board (ASB).

The financial statements have been prepared on a going concern basis.

The format and certain wordings of the financial statements has been adapted from those contained in the Companies (Amendment) Act, 1986 and Financial Reporting Standard (FRS 3) "Reporting Financial Performance" so that, in the opinion of the Directors, they more appropriately reflect the nature of the Company's business as an investment fund.

The Company has availed of certain exemptions contained in the FRS 1 Revised "Cash Flow Statements" and has presented a Statement of Changes in Net Assets Attributable to Redeemable Participating Shareholders in place of a cash flow statement. In the opinion of the Directors, this information also satisfies the requirement of FRS 3 'Reporting Financial Performance' in relation to a reconciliation of movements in Shareholders' funds.

The financial statements have been prepared under the historical cost convention as modified by the revaluation of financial assets and liabilities at fair value through profit or loss.

The Company is organised into one main business segment focusing on achieving returns representing the performance of the Total Return Swaps each Fund invests into. No additional disclosure is included in relation to segment reporting, as the Company's activities are limited to one main business segment.

#### **Estimates and judgements**

The preparation of financial statements in conformity with Irish GAAP requires the use of certain critical accounting estimates. It also requires the Board of Directors, based on the advice of the Investment Manager, to exercise its judgement in the process of applying the Company's accounting policies. Management also makes estimates and assumptions concerning the future. The resulting accounting estimates will, by definition, seldom equal the related actual results.

#### **Financial Instruments**

#### **Investments at Fair Value**

This category has two sub-categories: financial assets and liabilities held for trading, and those designated by Directors at fair value through profit or loss at inception. All instruments on each Fund's Schedule of Investments are classified as fair value through profit or loss.

Financial assets or liabilities held for trading are acquired principally for the purpose of selling in the short term. All other financial instruments are designated at fair value through profit or loss on initial recognition. Subsequent to initial recognition, all instruments classified at fair value through profit or loss are measured at fair value with changes in their fair value recognised in the Profit and Loss Account.

Regular purchases and sale of investments are recognised on trade date plus one day (t+1) basis for all Funds. Investments are initially recognised at fair value, and transaction costs for all financial assets carried at fair value through profit or loss are expensed as incurred. Investments are derecognised when the rights to receive cash flows from the investments have expired or the Company has transferred substantially all risks and rewards of ownership.

### **Total Return Swaps**

"Total Return Swap" is the generic name for any non traditional swap where one party agrees to pay the other the "total return" of a defined underlying reference obligation, usually in return for receiving a stream of LIBOR based cash flows. The total return swap may be applied to any underlying reference obligation but is most commonly used with equity indices, single stocks, bonds and defined portfolios of loans and mortgages.

### Notes to the Financial Statements for the year ended 31 March 2011 (continued)

### 1. Accounting Policies for the year ended 31 March 2011 (continued)

The RQSI GAA and HFRq Funds were established under the single Total Return Swap model, receiving from the swap counterparty – Nomura International Plc (and/or Nomura Bank International Plc) – the positive performance of the underlying index and in return paying the 'Index Replication Costs' plus any negative performance of the underlying index. This is known as an 'unfunded swap structure'. The GEM III, S&P DTI, S&P DTI (80%), Balanced Index and Flex EIL Funds were established under an alternative framework. Each of these Funds has entered into two swap contracts which have the same trading impact as the total return swap described in the previous paragraph. The first swap comprised the transfer of the notional amount on inception (as the case may be) to the counterparty - Nomura International Plc - for the receipt of JPY Libor over the period of the contract, while the second swap (consistent with the more typical total return swap) represented the transfer of the JPY Libor received from the first contract (as the case may be) to the counterparty - Nomura Bank International Plc - for the total return on the underlying reference asset. For disclosure purposes, herein the derivatives have been grouped together as in effect the contracts need to be viewed in their totality to appreciate the funds economic exposure.

The principal amounts will be returned by the relevant swap counterparty on the contracts' maturity. The total return swaps are recorded as financial assets at fair value in the Balance Sheet.

The financial statements include investments in total return swaps. The fair values of these total return swaps as at 31 March 2011 are USD63,672,434 or 100.40% of the Net Assets in the GEM III Fund, USD107,267,213 or 100.49% of the Net Assets in the S&P DTI Fund, USD6,737,280 or 100.95% of the Net Assets in the S&P DTI (80%) Fund, USDNil or 0.00% of the Net Assets in the RQSI GAA Fund due to swap being reset on 31 March 2011, EUR17,157,116 or 100.56% of the Net Assets in the Balanced Index Fund, EUR9,622,780 or 100.60% of the Net Assets in the Flex EIL Fund and USDNil or 0.00% of the Net Assets in the HFRq Fund due to swap being reset on 31 March 2011. The fair values of these total return swaps have been provided by the relevant swap counterparty, Nomura International plc and Nomura Bank International plc (see Note 11), based on their mark to market valuations and in accordance with the valuation requirements set out in the Company's Prospectus.

Due to the over the counter nature of the total return swaps and the resultant inherent uncertainty of the valuation, estimated values may differ significantly from values that would have been used had a ready market for the total return swaps existed and such differences could be material. The financial statements do not include any adjustments that might result from these uncertainties. In determining the mark to market valuation, the counterparties make assumptions that are based on market conditions existing at the relevant time and use valuation techniques which include the use of comparable recent arm's length transactions, discounted cash flow techniques, option pricing models and other valuation techniques commonly used by market participants. Realised and unrealised gains or losses on swaps are included in the Profit and Loss Account in Net gain/(loss) on financial assets and liabilities at fair value through profit or loss.

#### **Foreign Currency Transactions**

Items included in the individual Fund's financial statements are measured using the currency of the primary economic environment in which it operates (functional currency). Each individual Fund has also adopted its functional currency as the presentation currency, this is the US Dollar for the GEM III Fund, S&P DTI Fund, S&P DTI (80%) Fund, RQSI GAA Fund and the HFRq Fund, and the Euro (EUR) for the Balanced Index Fund and the Flex EIL Fund. The Company has adopted the Euro (EUR) as its presentation currency.

Monetary assets and liabilities denominated in currencies other than the functional currency are translated into the functional currency at the closing rates of exchange at each year end.

For the purpose of combining the financial statements of the Funds to arrive at Company figures (required under Irish Company Law), the amounts in the Balance Sheet have been translated to Euro at the exchange rate ruling at 31 March 2011 and the amounts in the Profit and Loss Account and the Statement of Changes in Net Assets Attributable to Redeemable Participating Shareholders are translated to Euro at the average rate of exchange for the year ended 31 March 2011.

The method of translation has no effect on the Net Asset Value per Share attributable to the individual Funds. The resulting loss at the year end of EUR12,228,257 (31 March 2010: loss of EUR7,167,633) is owing to the difference in the exchange rate used to translate Profit and Loss Account items and Balance Sheet items and the difference

### Notes to the Financial Statements for the year ended 31 March 2011 (continued)

### 1. Accounting Policies for the year ended 31 March 2011 (continued)

#### Foreign Currency Transactions (continued)

between the opening and closing balance sheet transaction rates and is included as a foreign currency translation adjustment in the Statement of Changes in Net Assets Attributable to Redeemable Participating Shareholders. This is a notional loss, which has no impact on the Net Asset Value of the Funds.

The rates of exchange ruling at the year end were:

|        |     | 31 March 2011 | 31 March 2010 |
|--------|-----|---------------|---------------|
| EUR1 = | CHF | 1.2983        | 1.4242        |
|        | GBP | 0.8853        | 0.8920        |
|        | JPY | 117.6150      | 126.4336      |
|        | NOK | 7.8501        | 8.0316        |
|        | SEK | 8.9523        | 9.7383        |
|        | USD | 1.4191        | 1.3531        |

The average rates of exchange for the year end were:

|        |     | 31 March 2011 | 31 March 2010 |
|--------|-----|---------------|---------------|
| EUR1 = | CHF | 1.3286        | 1.4966        |
|        | GBP | 0.8508        | 0.8856        |
|        | JPY | 112.6403      | 130.8290      |
|        | NOK | 7.9377        | 8.4985        |
|        | SEK | 9.2296        | 10.3168       |
|        | USD | 1.3271        | 1.4148        |

#### **Redeemable Participating Shares**

Redeemable Participating Shares are redeemable at the shareholder's option and are classified as financial liabilities. Redeemable Shares can be put back to the Company on any Dealing Day for cash equal to a proportionate share of the Company's Net Asset Value. The Redeemable Shares are carried at the redemption amount that is payable at the Balance Sheet date if the holder exercises the right to put the share back to the Company.

#### **Interest Income**

Interest income is recognised in the Profit and Loss Account on an accruals basis.

#### Expenses

All expenses, including management fees are recognised in the Profit and Loss Account on an accruals basis.

#### **Cash and Cash Equivalents**

Cash consists of cash on hand, bank balances, overnight deposits and cash balances held with State Street Custodial Services (Ireland) Limited.

#### **Offsetting Financial Instruments**

Financial assets and liabilities are offset and the net amount reported in the Balance Sheet when there is a legally enforceable right to offset the recognised amounts and there is an intention to settle on a net basis, or realise the asset and settle the liability simultaneously.

#### Collateral

The Company may receive collateral in the form of stock from counterparties for swap contracts. This collateral does not form part of the Company's assets.

#### **Debtors and Creditors**

Debtors and creditors represent amounts receivable and payable respectively, for transactions contracted but not yet delivered.

#### **Repurchase Agreements**

The Company may utilise repurchase agreements for efficient portfolio management purposes. A repurchase agreement arises when an investor purchases a security and simultaneously agrees to resell it to the counterparty to the repurchase agreement at an agreed-upon future date, normally one day or a few days later. The resale price is greater than the purchase price, reflecting an agreed-upon rate which is effective for the period of time the investor's money is

### Notes to the Financial Statements for the year ended 31 March 2011 (continued)

### 1. Accounting Policies for the year ended 31 March 2011 (continued)

### **Repurchase Agreements (continued)**

invested in the security and which is not related to the coupon rate on the purchased security. The Company will enter into repurchase agreements only with financial institutions with a minimum S&P credit rating of A2 or equivalent.

It is the Company's policy to take custody of securities to protect the Company in the event securities are not repurchased by the counterparty. The Company will monitor the value of collateral compared to the repurchase agreement obligation plus accrued interest. If the value of the collateral drops below the amount of the repurchase agreement obligation, additional collateral will be sought by the Company. If the event of default on the obligation to repurchase arises, the Company has the right to liquidate the collateral and apply the proceeds in satisfaction of the obligation. Default or bankruptcy of the seller would, however, expose the Company to possible loss because of adverse market action or delays in connection with the disposal of the collateral. Due to the seller's repurchase obligations, the collateral subject to repurchase agreements does not have maturity limitations.

### Forward Foreign Exchange Contracts

The Company enters into forward foreign exchange contracts for the purpose of efficient portfolio management. Forward foreign exchange contracts are valued at the forward rate and are marked to market on the valuation date. The change in value is included in Net gain/(loss) on financial assets and liabilities at fair value through profit or loss in the Profit and Loss Account. When the contract is closed, the Company records a realised gain or loss equal to the difference between the value of the contract at the time it was opened and the value at the time it was closed.

The unrealised gain or loss on open forward foreign exchange contracts is calculated by reference to the difference between the contracted rate and the rate to close out the contract. Realised gains or losses include net gains or losses on contracts which have been settled or offset by other contracts.

### 2. Net Gain/Loss on Financial Assets and Liabilities at Fair Value through Profit or Loss

### 7. Fees

### **Global Emerging Markets III 80% Protected Fund**

The fees for Class A (Retail) Shares, 0.75% of the Net Asset Value per Share (plus VAT, if any) annually, is payable by the Company out of the assets of the Fund to the Investment Manager, some or all of which may be paid to the Distributor, Sub-Distributors and/or other financial intermediaries or introducers. For Class I (Institutional) Shares, 0.15% of the Net Asset Value per Share (plus VAT, if any) annually is payable by the Company out of the assets of the Fund to the Investment Manager. The Management fees above will accrue daily and be calculated on each Dealing Day and paid quarterly or more frequently in arrears. The Investment Manager is not entitled to be reimbursed out of the assets of the Fund for its out of pocket expenses.

Up to 0.25% of the Net Asset Value of the Fund (plus VAT, if any) in aggregate, annually, is payable by the Company out of assets of the Fund to the Administrator and the Custodian in aggregate and in respect of each others cost. This fee will accrue daily and be calculated on each Dealing Day and paid quarterly or more frequently in arrears. Each of the Administrator and the Custodian is entitled to be repaid its agreed upon transaction and other charges (which will be at normal commercial rates and other out-of-pocket expenses out of the assets of the Fund (plus VAT if any)). For the year ended 31 March 2011, management fees of USD454,038 (31 March 2010: USD113,715) were incurred by the Fund and USD116,056 (31 March 2010: USD70,949) is payable as at 31 March 2011.

From 13 October 2009, 0.60% of the Net Asset Value of the Fund was payable by the Company out of the assets of the Fund for year ended 31 March 2011 to cover the cost of collateralising the Fund's exposure to its over-thecounter derivative counterparties. As further described in Note 12(b) the Company restricts its exposure to credit losses by holding collateral from the counterparties to the Portfolio Swap Transactions. For the year ended 31 March 2011, costs associated with this collateralisation (the Collateral Costs) of USD375,281 (31 March 2010: USD99,097) were incurred by the Fund.

### Notes to the Financial Statements for the year ended 31 March 2011 (continued)

### 7. Fees (continued)

### S&P Diversified Trends Indicator Fund

The fees for the Class A Shares, 1.25% of the Net Asset Value per Share (plus VAT, if any) annually, is payable by the Company out of the assets of the Fund to the Investment Manager, some or all of which may be paid to the Distributor, Sub-Distributors and/or other financial intermediaries or introducers. For the Class I Shares 0.45%, of the Net Asset Value per Share (plus VAT, if any) annually, is payable by the Company out of the assets of the Fund to the Investment Manager. The Management fees above will accrue daily and be calculated on each Dealing Day and paid quarterly or more frequently in arrears. The Investment Manager will not be entitled to be reimbursed out of the assets of the Fund for its out-of-pocket expenses.

The Management fees above will accrue daily and be calculated on each Dealing Day and paid quarterly or more frequently in arrears. The Investment Manager is not entitled to be reimbursed out of the assets of the Fund for its out of pocket expenses.

Up to 0.25% of the Net Asset Value of the Fund (plus VAT, if any) in aggregate, annually, is payable by the Company out of the assets of the Fund in respect of fees payable to the Administrator and the Custodian in aggregate and in respect of each others cost. This fee will accrue daily and be calculated on each Dealing Day and paid quarterly or more frequently in arrears. Each of the Administrator and the Custodian is entitled to be repaid its agreed upon transaction and other charges (which will be at normal commercial rates) and other out-of-pocket expenses out of the assets of the Fund (plus VAT if any). For the year ended 31 March 2011, management fees of EUR51,591 (31 March 2010: EURNil) were incurred by the Fund and EUR22,428 (31 March 2010: EURNil) is payable as at 31 March 2011.

### Flex Europe Index Linked Fund

The fees for Class A (Retail) shares, 1.50% of the Net Asset Value per Share (plus VAT, if any) annually, is payable by the Company out of the assets of the Fund to the Investment Manager, some or all of which may be paid to the Distributor, Sub-Distributors and/or other financial intermediaries or introducers. For Class I (Institutional) Shares, effective 16 March 2011 at 0.50% (formerly 0.75%) of the Net Asset Value per Share (plus VAT, if any) annually is payable by the Company out of the assets of the Fund to the Investment Manager some of which may be paid to the Distributor, Sub-Distributors and / or other financial intermediaries or introducers. The Management fees above will accrue daily and be calculated on each Dealing Day and paid quarterly or more frequently in arrears. The Investment Manager is not entitled to be reimbursed out of the assets of the Fund for its out of pocket expenses.

Up to 0.25% of the Net Asset Value of the Fund (plus VAT, if any) in aggregate, annually, is payable by the Company out of the assets of the Fund in respect of fees payable to the Administrator and the Custodian in aggregate and in respect of each others cost. This fee will accrue daily and be calculated on each Dealing Day and paid quarterly or more frequently in arrears. Each of the Administrator and the Custodian is entitled to be repaid its agreed upon transaction and other charges (which will be at normal commercial rates) and other out-of-pocket expenses out of the assets of the Fund (plus VAT if any). For the year ended 31 March 2011, management fees of EUR73,157 (31 March 2010: EURNil) were incurred by the Fund and EUR26,481 (31 March 2010: EURNil) is payable as at 31 March 2011.

### Notes to the Financial Statements for the year ended 31 March 2011 (continued)

### 7. Fees (continued)

### HFRq UCITS III Fund

The fees for Class A (Retail) shares, 1.10% of the Net Asset Value per Share (plus VAT, if any) annually, is payable by the Company out of the assets of the Fund to the Investment Manager, some or all of which may be paid to the Distributor, Sub-Distributors and/or other financial intermediaries or introducers. For Class I (Institutional) Shares, 0.10% of the Net Asset Value per Share (plus VAT, if any) annually is payable by the Company out of the assets of the Fund to the Investment Manager some of which may be paid to the Distributor, Sub-Distributors and/or other financial intermediaries or introducers. For Class I (Institutional) Shares, 0.10% of the Net Asset Value per Share (plus VAT, if any) annually is payable by the Company out of the assets of the Fund to the Investment Manager some of which may be paid to the Distributor, Sub-Distributors and/or other financial intermediaries or introducers. The Management fees above will accrue daily and be calculated on each Dealing Day and paid quarterly or more frequently in arrears. The Investment Manager is not entitled to be reimbursed out of the assets of the Fund for its out of pocket expenses.

Up to 0.25% of the Net Asset Value of the Fund (plus VAT, if any) in aggregate, annually, is payable by the Company out of the assets of the Fund in respect of fees payable to the Administrator and the Custodian in aggregate and in respect of each others cost. This fee will accrue daily and be calculated on each Dealing Day and paid quarterly or more frequently in arrears. Each of the Administrator and the Custodian is entitled to be repaid its agreed upon transaction and other charges (which will be at normal commercial rates) and other out-of-pocket expenses out of the assets of the Fund (plus VAT if any). For the year ended 31 March 2011, management fees of USD102,747 (31 March 2010: USDNil) were incurred by the Fund and USD38,451 (31 March 2010: USDNil) is payable as at 31 March 2011.

### 8. Efficient Portfolio Management

The Funds may enter into one or more total return swaps whereby two parties enter an agreement whereby they swap periodic payment over the specified life of the agreement. One party makes payments based upon the total return (coupons plus capital gains or losses) of a specified reference asset. The other makes fixed or floating payments as with a vanilla interest rate swap. Both parties' payments are based upon the same notional amount. The reference asset can be almost any asset, index or basket of assets. Each Fund expects to enter into these transactions primarily to preserve a return or spread on a particular investment or portion of the relevant Fund's portfolio or to protect against any increase in the price of securities that the Fund anticipates purchasing at a later date.

Contracts outstanding at 31 March 2011 are disclosed in the Schedules of Investments. Realised gains and losses on financial instruments used for efficient portfolio management purposes are included in the Profit and Loss Account.

### Notes to the Financial Statements for the year ended 31 March 2011 (continued)

### 10. Taxation

Under current law and practice the Company qualifies as an investment undertaking as defined in section 739B of the Taxes Consolidation Act, 1997, as amended. On that basis, it is not chargeable to Irish tax on its income and gains. However, Irish tax may arise on the happening of a "chargeable event". A chargeable event includes any distribution payments to shareholders or any encashment, redemption, cancellation or transfer of shares and the holding of shares at the end of each eight year period beginning with the acquisition of such shares. No Irish tax will arise on the Company in respect of chargeable events in respect of:

- (a) a shareholder who is neither Irish resident nor ordinarily Irish resident in Ireland for tax purposes, at the time of the chargeable event, provided appropriate valid declarations in accordance with the provisions of the Taxes Consolidation Act, 1997, as amended, are held by the Company, and
- (b) certain exempted Irish tax resident shareholders who have provided the Company with the necessary signed statutory declarations.

Dividends, interest and capital gains (if any) received on investments made by the Company may be subject to withholding taxes imposed by the country from which investment income/gains are received and such taxes may not be recoverable by the Company or its shareholders.

### 11. Related Party Disclosures

In the opinion of the Directors, the Investment Manager is a related party under FRS 8 'Related Party Transactions'. Nomura International Plc and for certain Funds, Nomura Bank International Plc, are also the counterparties for the total return swaps held by the Funds. Nomura International Plc acts as Distributor to the Company. As at the year end Nomura International Plc and Nomura Bank International Plc have provided fair values for all the total return swaps in the Financial Statements at the year end. As at 31 March 2011 EURNil (31 March 2010: EUR20,132) is receivable from the counterparties.

The Directors who are not associated with Nomura International Plc will be entitled to remuneration for their services as Directors, provided however that the aggregate emoluments of each such Director shall not exceed EUR15,000 or such other amount as may be approved by a resolution of the Directors or the Shareholders in general meeting. In addition, all of the Directors will be entitled to be reimbursed out of the assets of each Fund for their reasonable out-of-pocket expenses incurred in discharging their duties as Directors.

Directors Fees for the year ended 31 March 2011 were EUR48,766 (31 March 2010: EUR52,707) and EUR22,490 (31 March 2010: EUR20,505) is payable to the Directors at the year end.

Ms. Grazzia Horn is an employee of Nomura International Plc and holds one subscriber share in the Company. Mr. Reza Ghassemieh who resigned as a Director of the Company on 27 May 2010 and is no longer an employee of Nomura International Plc and Mr. Stephen Cohen who was appointed as a Director of the Company on 27 May 2010 and resigned as a Director on 13 July 2011 is an employee of Nomura International Plc.

Nomura International Plc, as a related party has a 2.77% shareholding in the GEM III Fund.

Nomura International Plc, as a related party has a 97.56% shareholding in the Balanced Index Fund.

Nomura International Plc, as a related party has a 100% shareholding in the Flex EIL Fund.

Nomura International Plc, as a related party has a 73.72% shareholding in the HFRq Fund.

### Notes to the Financial Statements for the year ended 31 March 2011 (continued)

### 12. Risks, Derivatives and Other Financial Instruments

#### General Risk Management Process

Enovara's activities expose it to a variety of financial risks. Management of these risks is fundamental to the Company's business. The risk management process is managed by Nomura International plc, in its capacity as Investment Manager, and oversight of this function is carried out by both the Custodian, State Street Custodial Services (Ireland) Limited, and by the Board of Directors.

The risk management process seeks to minimise potential adverse effects on the Funds' financial performance. This is achieved through careful selection of investments which incorporate features such as protection mechanisms, inbuilt hedging strategies and diverse underlyings. Where a particular risk is considered material, it is managed by one of a number of specialist teams.

As defined in FRS29, the risk related to financial instruments can be separated into the following components: market risk, credit risk and liquidity risk. The following section discusses each type of risk in turn and qualitative and quantitative analyses are provided where relevant.

#### (a) Market Risk

This is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices. Market risk comprises 3 types of risk: market price risk, currency risk and interest rate risk.

#### i) Market Price Risk

This is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices (other than those arising from interest rate risk and currency risk), whether those changes are caused by factors specific to individual financial instruments or its issuer, or other factors affecting similar financial instruments traded in the market.

#### 80% Protected Funds:

#### Global Emerging Markets III 80% Protected Portfolio Fund S&P Diversified Trends Indicator 80% Protected Fund

These Funds will generally be fully invested in one or more total return swaps. The swaps provide the return of a particular portfolio which is consistent with the investment objective of the Fund. The swaps are susceptible to market price risk arising from uncertainties about future prices of the underlying portfolios. The Investment Manager moderates this risk through the careful selection of swaps which include a protection mechanism which limits losses to 20% of the highest net asset value per share since launch.

Fund Exposure:

| Fund   | Exposure   |
|--|--|
| Global Emerging Markets III 80% Protected Portfolio Fund | Emerging Market equities via an index of 6 globally diversified actively managed mutual funds. |
| S&P Diversified Trends Indicator 80% Protected Fund      | Systematic index based on a basket of 24 liquid commodity and financial futures.               |

The Funds' exposure to market price risk at 31 March 2011 is equivalent to the fair value of investments held as detailed in the Schedules of Investments. (For exposure at 31 March 2010, see the relevant Balance Sheet).

#### **Tracker Funds:**

S&P Diversified Trends Indicator Fund RQSI Global Asset Allocation Fund Nomura Balanced Index Fund – launched on 7 May 2010 Flex Europe Index Linked Fund – launched on 30 July 2010 HFRq UCITS III Fund – launched on 5 August 2010

### Notes to the Financial Statements for the year ended 31 March 2011 (continued)

### 12. Risks, Derivatives and Other Financial Instruments (continued)

### (a) Market Risk (continued)

### i) Market Price Risk (continued)

These Funds will generally be wholly invested in one or more total return swaps. The swaps provide the return of the S&P Diversified Trends Indicator Tracker Series ("S&P DTI"), the Nomura RQSI GAA Index, the Nomura EUR Balanced Index, the Nomura Flex Europe Index and the HFRq UCITS III Index respectively. The S&P DTI is a globally diversified basket of 24 highly liquid commodity and financial futures, equally weighted between commodities and financial futures. The Nomura RQSI GAA Index is a systematic index targeting low volatility and absolute returns using econometric and technical assessment and fundamental and relative analysis to generate daily allocations across 53 futures contracts covering four major asset classes; Equities, Fixed Income, Commodities and Currencies. The Nomura EUR Balanced Index aims to deliver the performance of a strategic allocation across the following asset classes: developed market equities, emerging market equities, commodities, real estate, sovereign bonds and investment grade corporate bonds. The Nomura Flex Europe Index aims to outperform a direct investment in the European large-cap equity market in the long term and is designed to capture positive performance of the market, while aiming to protect potential gains during market downturns. The HFRq UCITS III Index represents long and short futures contracts (together, the "Index Components") on global equities, commodities, currencies, global fixed income and volatility, selected and maintained by HFR Asset Management, LLC (the "Index Sponsor"). The Index Components are selected on the basis of an algorithmic and rules-based index methodology in order to seek to achieve a high correlation to the performance of the HFRi Fund Weighted Composite Index (which reflects the performance of a diversified pool of hedge funds). The swaps for such Tracker Funds are susceptible to market price risk arising from uncertainties about future prices of their respective Index due to movement in prices of Index Components.

The Fund's exposure to market price risk at 31 March 2011 is equivalent to the fair value of investments held as detailed in the Schedules of Investments. (For exposure at 31 March 2010, see the relevant Balance Sheet).

Market price risk is managed through introducing protection mechanisms in the fund structure (as is the case for the 80% protected funds), aiming to protect gains during market downturns by reducing exposure to risky markets (as is the case for the Flex EIL Fund), or selecting a diversified portfolio of underlying assets using quantitative, fundamental, econometric and technical or rule based index methodologies (as is the case for the tracker funds). On an on-going basis, market price risk is managed via adherence to the diversification rules set out in the UCITS investment restrictions, plus the UCITS borrowing restrictions.

The tables show the change in net assets resulting from a movement in the relevant underlying asset with all other variables held constant. These sensitivity analyses represent a hypothetical outcome and are not intended to be predictive.

### Notes to the Financial Statements for the year ended 31 March 2011 (continued)

### 12. Risks, Derivatives and Other Financial Instruments (continued)

### (a) Market Risk (continued)

### ii) Currency Risk

Currency risk is defined in FRS 29 as the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in foreign exchange rates. This risk arises on financial instruments that are denominated in a currency other than the functional currency in which they are measured. For the purposes of FRS 29 currency risk does not arise from financial instruments that are non-monetary items or from financial instruments denominated in the functional currency.

For the Enovara Funds, each share class only holds total return swaps denominated in the functional currency of the share class. Therefore at the share class level, the exposure to currency risk is low and restricted to any cash balance at the Fund level.

However, for certain share classes, there will also be currency risk embedded in the total return swaps themselves. This currency risk will exist when the total return swap is denominated in a currency which differs from that of the underlying assets in the portfolio. The Investment Manager moderates this risk through careful selection of swaps which include an in-built currency hedging strategy which dynamically hedges to minimize the impact of exchange rate movements between the underlying assets and the total return swaps.

### iii) Interest Rate Risk

This risk is defined as the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. This risk arises on financial instruments whose fair value or future cash flows are affected by changes in interest rates.

Notes to the Financial Statements for the year ended 31 March 2011 (continued)

- 12. Risks, Derivatives and Other Financial Instruments (continued)
- (a) Market Risk (continued)
- iii) Interest Rate Risk (continued)
- 80% Protected Funds and Tracker Funds:

Global Emerging Markets III 80% Protected Fund S&P Diversified Trends Indicator 80% Protected Fund S&P Diversified Trends Indicator Fund RQSI Global Asset Allocation Fund Nomura Balanced Index Fund – launched on 7 May 2010 Flex Europe Index Linked Fund – launched on 30 July 2010 HFRq UCITS III Fund – launched on 5 August 2010

Interest rate exposure on these Funds primarily arises on the cash balance in the Fund and the efficient portfolio management therein. All such long cash balances earn interest at short-term market rates and all such short cash balances are charged at short-term market rates and hence the interest rate exposure in these Funds is minimal.

### (b) Credit Risk

This is the risk that one party to a financial instrument will cause a financial loss for the other party by failing to discharge an obligation. This includes counterparty risk and issuer risk.

In relation to Enovara, credit risk arises in the form of counterparty risk from entering into over-the-counter derivative contracts and other financial instruments for efficient portfolio management purposes. All the derivative contracts are with one of two counterparties, Nomura International plc or Nomura Bank International plc and the efficient portfolio management instruments are with Nomura Bank International plc or Nomura Capital Markets. The Company restricts its exposure to credit losses by holding collateral from its counterparties. On any day, the collateral held will cover at least 90% of the counterparty risk exposure, as measured under UCITS guidelines. In the case of the derivative contracts, such counterparty risk exposure includes an add-on (to the actual credit risk exposure) for future credit exposure. Thus for these contracts, the counterparty risk exposure will exceed the actual credit risk exposure. The collateral position is managed daily by the Collateral Management Group (at the Investment Manager) and reviewed weekly by the Risk Management team.

Enovara does not have any exposure to issuer risk as the Funds do not hold debt securities.

### Notes to the Financial Statements for the year ended 31 March 2011 (continued)

### 12. Risks, Derivatives and Other Financial Instruments (continued)

### (b) Credit Risk (continued)

The Company's Custodian is State Street Custodial Services (Ireland) Limited ("Custodian"). All of the cash of the Company is held within the custodial network except in certain circumstances the Company may place cash on deposit with certain third party institutions. Bankruptcy or insolvency of the Custodian or of its parent company State Street Corporation may cause the Company's rights with respect to its investments held by the Custodian to be delayed.

### (c) Liquidity Risk

This is the risk that the Company will encounter difficulty in meeting obligations associated with financial liabilities. The Company is structured as an open-ended umbrella fund with segregated liability between Funds. As such there is no potential for cross liability between Funds and hence liquidity risk needs to be managed at the Fund level.

The main financial liability of each Fund is the redemption of redeemable participating shares. As an open-ended investment company with variable capital, the Company is required to sell shares back to shareholders at a price equivalent to the net asset value per share, subject to the settlement and dealing restrictions laid down in the Company's Articles of Association and Prospectus.

To meet the redemption liability, the Fund will generally be required to unwind a portion of its total return swaps. The swaps are traded over-the-counter and hence are not traded in an organised market and may be illiquid particularly during adverse market conditions, which may affect their fair value.

The Investment Manager manages each Fund's liquidity position on a daily basis. Also the Directors are entitled, by the provisions in the prospectus, to limit the number of shares in a Fund repurchased on any given day to shares representing 10% of the total net asset value of the Fund. This is to facilitate an orderly disposition of securities as in the interest of the remaining shareholders.

The Company's exposure to liquidity risk is detailed in the table below. Based on the remaining period at the Balance Sheet date to the contracted maturity date, these financial liabilities are all due within 3 months.

| As at 31 March 2011               | TOTAL       | GEM III<br>FUND | S&P DTI<br>FUND | S&P DTI (80%)<br>FUND |

### (d) Fair valuation hierarchy

Effective 1 January 2009, the Company adopted the amendment to FRS29 'Financial Derivatives Disclosure'. This requires the Company to classify fair value measurements using a fair value hierarchy that reflects the significance of the inputs used in making the measurements.

The level in the fair value hierarchy within which the fair value measurement is categorised in its entirety is determined on the basis of the lowest level input that is significant to the fair value measurement in its entirety. For this purpose, the significance of an input is assessed against the fair value measurement in its entirety. If a fair value measurement uses observable inputs that require significant adjustment based on unobservable inputs, that measurement is a Level 3 measurement. Assessing the significance of a particular input to the fair value measurement in its entirety requires judgement, considering factors specific to the asset or liability.

The determination of what constitutes 'observable' requires significant judgement by the Company. The Company considers observable data to be that market data that is readily available, regularly distributed or updated, reliable and verifiable, not proprietary, and provided by independent sources that are actively involved in the relevant market. More detailed descriptions of the three levels of classification within the fair valuation hierarchy can be found below:

Level 1 Investments: These are investments whose fair value is determined using observable, unadjusted quoted prices in active markets for identical assets. Active markets are markets in which transactions occur for the item to be fair valued with sufficient frequency and volume to provide pricing information on an ongoing basis. Equity securities and exchange traded futures are generally classified within level 1 of the fair value hierarchy.

Level 2 Investments: These are investments whose fair value is determined using inputs other than quoted prices included within level 1 inputs that are observable, either directly or indirectly through corroboration with market data. These inputs include quoted prices for similar assets or liabilities in active markets, quoted prices for identical or similar assets or liabilities in markets that are not active, inputs other than quoted prices that are observable for the asset (e.g., interest rates and yield curves observable at commonly quoted intervals, volatilities, prepayment speeds, loss severities, credit risks, and default rates) and inputs that are derived principally from or corroborated by observable market data by correlation or other means. Money market vehicles, repurchase agreements, certain fixed income securities, foreign equity securities valued using third-party fair value models, mutual funds and most derivatives are generally classified within level 2 of the fair value hierarchy.

Level 3 Investments: These are investments whose fair value is determined using inputs that are not observable. Investments are classified within level 3 only when observable inputs (level 1 and 2) are not available. Unobservable inputs are generally developed based on the best information available. Fixed income securities valued using indicative single broker quotes (not firm offers to purchase) are generally classified within level 3 of the fair value hierarchy.

The Company also considers other liquidity, credit and market risk factors. It adjusts the model as deemed necessary. Discounted cash flows are calculated using the average rate of inflation during the financial year.

### Notes to the Financial Statements for the year ended 31 March 2011 (continued)

### 12. Risks, Derivatives and Other Financial Instruments (continued)

### (d) Fair valuation hierarchy (continued)

During the year ended 31 March 2011 there were no transfers between Level 1 and Level 2 of the fair valuation hierarchy for financial assets, financial liabilities or derivative financial instruments.

There were no investments classified as Level 3 as at 31 March 2011.

The following tables classify each Sub-Funds financial assets, financial liabilities and derivative financial instruments held at 31 March 2011in accordance with the levelling requirements of FRS29:

### Portfolio Turnover Rate (unaudited)

## As at 31 March 2011

### Methodology

The PTR provides an indication of the level of transactions carried out during the 12 months ended 31 March 2011. Portfolio management techniques (e.g. stock lending and repurchase agreements) are not included as a purchase or sale of securities for the purposes of calculation:

[(Total 1 - Total 2) / M] \* 100

Where

Total 1 = Purchase of securities + Sale of securities (excluding stock lending and repurchase agreements) Total 2 = Subscriptions of Shares + Redemptions of Shares

M = Monthly average of total net assets (i.e. average of daily net assets value)

| Fund   | PTR      |
|--|----------|
| Global Emerging Markets III 80% Protected Portfolio Fund | 1.77     |
| S&P Diversified Trends Indicator 80% Protected Fund      | 3.59     |
| S&P Diversified Trends Indicator Fund                    | 2.10     |
| RQSI Global Asset Allocation Fund                        | (169.25) |
| Nomura Balanced Index Fund*                              | 1.85     |
| Flex Europe Index Linked*                                | 0.58     |
| HFRq UCITS III Fund*                                     | (539.12) |

\* The PTR for each of these Funds has been calculated from date of launch (see Note 13) to 31 March 2011.
