#### Directors' statement

We Christopher Michael Mason Darke and Kelvin Ho Teik Chye, being two of the directors of Nomura International Funding Pte. Ltd. (the "Company"), do hereby state that, in our opinion of the directors:

- (a) the accompanying statement of comprehensive income, balance sheet, statement of changes in equity and cash flow statement together with notes thereto are drawn up in accordance with International Financial Reporting Standards ("IFRS") so as to present fairly of the state of affairs of the Company as at 31 March 2023 and the results of the business, changes in equity and cash flows of the Company for the financial year ended on that date; and
- (b) at the date of this statement, there are reasonable grounds to believe that the Company will be able to pay its debts as and when they fall due.

On behalf of the Board of Directors:

Christopher Michael Mason Darke Director

Kelvin Ho Teik Chye Director

Singapore 26 July 2023

Independent auditor's report
For the financial year ended 31 March 2023

Independent auditor's report to the member of Nomura International Funding Pte. Ltd.

## Report on the audit of the financial statements

#### Opinion

We have audited the financial statements of Nomura International Funding Pte. Ltd. (the "Company"), which comprise the balance sheet as at 31 March 2023, and the statement of comprehensive income, statement of changes in equity and cash flow statement for the year then ended, and notes to the financial statements, including a summary of significant accounting policies.

In our opinion, the accompanying financial statements are properly drawn up in accordance with International Financial Reporting Standards ("IFRS") so as to present fairly, in all material respects, the financial position of the Company as at 31 March 2023 and of the financial performance, changes in equity and cash flows of the Company for the year ended on that date.

## Basis for opinion

We conducted our audit in accordance with Singapore Standards on Auditing ("SSAs"). Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are independent of the Company in accordance with the Accounting and Corporate Regulatory Authority ("ACRA") Code of Professional Conduct and Ethics for Public Accountants and Accounting Entities ("ACRA Code") together with the ethical requirements that are relevant to our audit of the financial statements in Singapore, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the ACRA Code. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

# Key audit matters

Key audit matters are those matters that, in our professional judgement, were of most significance in our audit of the financial statements of the current period. These matters were addressed in the context of our audit of the financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters. For each matter below, our description of how our audit addressed the matter is provided in that context.

We have fulfilled the responsibilities described in the Auditor's responsibilities for the audit of the financial statements section of our report, including in relation to these matters. Accordingly, our audit included the performance of procedures designed to respond to our assessment of the risks of material misstatement of the financial statements. The results of our audit procedures, including the procedures performed to address the matters below, provide the basis for our audit opinion on the accompanying financial statements.

# Key audit matters (cont'd)

#### Valuation of financial instruments

The structured notes issued by the Company, which are classified as financial liabilities designated at fair value through profit or loss, represented 78% (USD8.8 billion) of the Company's total liabilities as at 31 March 2023. The derivative financial instruments entered into by the Company for hedging purposes represented 3% (USD0.4 billion) of total assets and 21% (USD2.4 billion) of total liabilities respectively as at 31 March 2023, of which USD25.9 million derivative financial assets and USD538.3 million derivative financial liabilities are classified as level 3 derivative financial instruments.

Certain Level 2 and Level 3 financial instruments are valued based on complex valuation models. In addition, Level 3 financial instruments are valued based on inputs other than quoted price, which often involves the exercise of judgment and the use of estimates. For financial liabilities designated at fair value through profit or loss, we also determined that significant judgement is applied in determining the inputs and assumptions in the valuation of the Own Credit Adjustment ("OCA").

As part of our audit, we assessed the key management controls over the valuation of all Level 2 and level 3 financial instruments, including those within the model validation process and the independent price verification process. Further, for selected samples of financial instruments, we involved our internal valuation specialists to independently assess the valuation output, including the OCA methodology and computation, by reference to alternative valuation methods used by other market participants to develop our own range of values. The related disclosures on the inputs used by management other than quoted prices is disclosed in Note 19(c) Level 3 Fair Value Measurements. The fair value hierarchy of the financial instruments is disclosed in Note 19(a) Fair Value Hierarchy.

#### Other matter

For the purpose of statutory filing with the Accounting and Corporate Regulatory Authority of Singapore, the Company will be preparing a separate set of financial statements for the year ended 31 March 2023 in accordance with the provisions of the Companies Act 1967 and Singapore Financial Reporting Standards, on which we expect to issue a separate auditor's report.

#### Other information

Management is responsible for other information. The other information comprises general information and directors' statement, but does not include the financial statements and our auditor's report thereon.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Independent auditor's report
For the financial year ended 31 March 2023

Independent auditor's report to the member of Nomura International Funding Pte. Ltd.

## Responsibilities of management and directors for the financial statements

Management is responsible for the preparation and fair presentation of financial statements in accordance with IFRSs, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

The directors' responsibilities include overseeing the Company's financial reporting process.

# Auditor's responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with SSAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with SSAs, we exercise professional judgement and maintain professional scepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit
  procedures that are appropriate in the circumstances, but not for the purpose of expressing
  an opinion on the effectiveness of the Company's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.

Independent auditor's report
For the financial year ended 31 March 2023

Independent auditor's report to the member of Nomura International Funding Pte. Ltd.

## Auditor's responsibilities for the audit of the financial statements (cont'd)

 Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with the directors regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

Notes to the financial statements For the financial year ended 31 March 2023

#### 1. Corporate information

Nomura International Funding Pte. Ltd. (the "Company") was incorporated on 17 May 2012. The Company is a private limited company incorporated in Singapore. Its immediate and ultimate holding company is Nomura Holdings Inc., incorporated in Japan.

The registered office of the Company is located at 10 Marina Boulevard, Marina Bay Financial Centre Tower 2, #36-01, Singapore 018983.

The principal activity of the Company is that of issuance of structured credit, equity, interest rate and foreign exchange linked notes for the global markets international business outside of Japan.

#### 2. Summary of significant accounting policies

## 2.1 Basis of preparation

The financial statements of the Company have been prepared in accordance with International Financial Reporting Standards ("IFRS").

The financial statements have been prepared on a historical cost basis except as disclosed in the accounting policies below.

The financial statements are presented in United States dollars ("USD" or "US\$") and all values in the tables are rounded to the nearest thousand (USD'000) except when otherwise indicated.

#### 2.2 Changes in accounting policies

The accounting policies adopted are consistent with those of the previous financial year except in the current financial year, the Company has adopted all the new and revised IFRS, standards International Accounting Standards ("IAS"), IAS and International Financial Reporting Interpretations of Committee ("IFRIC") interpretations which are effective for annual periods beginning on or after 1 April 2022. The adoption of these standards did not have any material impact on the financial performance or position of the Company.

#### 2.3 Impact of standards issued but not yet effective

The Company has not adopted the following standards that have been issued but are not yet effective:

Effective for annual

Description	periods beginning on or after
IFRS 17 Insurance Contracts	1 January 2023
Amendments to IAS 8 Definition of Accounting Estimates Amendments to IAS 1 and IFRS Practice Statement 2	1 January 2023
Disclosure of Accounting Policies Amendments to IFRS 10 and IAS 28 Sales or Contribution of	1 January 2023
Assets between an Investor and its Associate or Joint Venture Amendments to IAS 12 Deferred Tax Related to Assets and	Date to be determined
Liabilities Arising from a Single Transaction  Amendment to IAS 1 Presentation of Financial Statements	1 January 2023
Classification of Liabilities as Current or Non-Current	1 January 2024
Amendment to IFRS 16 Lease Liability in a Sale and Leaseback	1 January 2024

The directors expect that the adoption of the standards above will have no material impact on the financial statements in the period of initial application.

# 2.4 Significant accounting estimates and judgements

The preparation of the Company's financial statements requires management to make judgements, estimates and assumptions that affect the reported amounts of revenues, expenses, assets and liabilities and the disclosure of contingent liabilities at the end of each reporting period. Uncertainty about these assumptions and estimates could result in outcomes that require a material adjustment to the carrying amount of the asset or liability affected in the future periods.

Key sources of estimation uncertainty

#### (a) Impairment losses on financial assets

Allowance for impairment of financial assets is determined in accordance with Note 2.9. This requires management's experience and judgement in relation to the forward looking assumptions used in the expected credit loss allowance computation to evaluate various factors such as economic indicators, significant increase in credit risk, business prospects, timing and amount of future cash flows.

#### 2.4 Significant accounting estimates and judgements (cont'd)

Key sources of estimation uncertainty (cont'd)

#### (b) Fair value of financial instruments

The fair value financial instruments that are not quoted in active markets are determined using valuation techniques. Where valuation techniques (e.g. models) are used to determine fair value, they are validated and periodically reviewed by qualified personnel independent of the area that created them. All models are validated by an independent model validation group before they are used and models are calibrated to ensure that outputs reflect actual data and comparative market prices. To the extent practical, models will use observable data.

However, certain input parameters such as credit risks (both own and counterparty), volatilities and correlations may require management to make estimates. Changes in assumptions about the input parameters may affect the reported fair value of financial instruments. Refer to Note 19 for more details.

Market factors such as the impact of the rates change, Russia-Ukraine war are factors that may result in significant market volatility, therefore impacting movements in rates and credit spreads used in determining the fair value of financial instruments. The impact on the credit spreads may impact the OCA curve which is used for the purpose of calculating the OCA that forms part of the fair value of the financial liabilities designated at fair value through profit and loss.

# (c) Taxes

Significant judgement is involved in determining the Company's provision for taxation. There are certain transactions and computations for which the ultimate tax determination is uncertain during the ordinary course of business. The Company recognises liabilities for expected tax issues based on estimates of whether additional taxes will be due. Where the final tax outcome of these matters is different from the amounts that were initially recognised, such differences will impact the income tax and deferred tax provisions in the financial year in which such determination is made.

Deferred tax assets are recognised for all deductible temporary differences to the extent that it is probable that taxable profit will be available against which the deductible temporary differences can be utilised. Significant management judgement is required to determine the amount of deferred tax assets that can be recognised, based upon the likely timing and level of future taxable profits together with future tax planning strategies. The related tax disclosure is made in Note 9.

## 2.5 Functional currency

The functional currency of the Company is the US\$. The Company is of the opinion that the US\$ reflects the economic substance of the underlying events and circumstances relevant to the Company.

#### 2.6 Foreign currencies

Transactions in foreign currencies are measured and recorded on initial recognition in the functional currency at exchange rates approximating those ruling at the transaction dates. Monetary assets and liabilities denominated in foreign currencies are translated at the rate of exchange ruling at the end of the reporting period. Non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rates as at dates of the initial transactions. Non-monetary items measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value was measured.

Exchange differences arising on the settlement of monetary items or on translating monetary items at the end of the reporting period are recognised in profit or loss.

#### 2.7 Cash and cash equivalents

Cash and cash equivalents comprise cash balances held with banks with reputable standing and hence are subject to an insignificant risk of changes in value.

#### 2.8 Financial assets

Initial recognition and measurement

Financial assets are classified, at initial recognition, as subsequently measured at amortised cost and fair value through profit or loss. The Company determines the classification of its financial assets at initial recognition. The classification of financial assets at initial recognition depends on the financial asset's contractual cash flow characteristics and the Company's business model for managing them.

When financial assets are recognised initially, they are measured at fair value, plus, in the case of financial assets not at fair value through profit or loss, directly attributable transactions costs. Transaction costs of financial assets carried at fair value through profit or loss are expensed in profit or loss.

# 2.8 Financial assets (cont'd)

Subsequent measurement

The subsequent measurement of financial assets depends on their classification as follows:

#### (a) Financial assets at fair value through profit or loss

Financial assets at fair value through profit or loss includes financial assets held for trading and designated upon initial recognition as at fair value through profit or loss. All derivatives that are held-for-trading are fair value through profit or loss. Financial assets designated at fair value through profit or loss are fully funded over-the-counter equity options which are risk managed on a fair value basis where the Company elects the fair value option.

Subsequent to initial recognition, financial assets in this category are measured at fair value with gains or losses arising from changes in fair value recognised in profit or loss within "net gains/losses from trading activities".

# (b) Financial assets at amortised cost

The Company measures financial assets at amortised cost if both of the following conditions are met:

- The financial asset is held within a business model with the objective to hold financial assets in order to collect contractual cash flows; and
- The contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

Financial assets at amortised cost are subsequently measured using the effective interest method and are subject to impairment. Gains and losses are recognised in profit or loss when the asset is derecognised or impaired, and through amortisation process.

Financial assets at amortised cost are subsequently measured using the effective interest method and are subject to impairment. Gains and losses are recognised in profit or loss when the asset is derecognised or impaired, and through amortisation process. Financial assets at amortised cost include loans, receivables from third parties and receivables from related companies that are held for the collection of contractual cash flows.

#### Regular way purchase or sale of a financial asset

All regular way purchases and sales of financial assets are recognised or derecognised on the trade date i.e., the date that the Company commits to purchase or sell the asset. Regular way purchases or sales are purchases or sales of financial assets that require delivery of assets within the financial period generally established by regulation or convention in the marketplace concerned.

#### 2.8 Financial assets (cont'd)

De-recognition

A financial asset (or, where applicable a part of a financial asset or part of a group of similar financial assets) is derecognised where:

- The contractual rights to receive cash flows from the asset have expired;
- The Company retains the contractual rights to receive cash flows from the asset, but has assumed an obligation to pay them in full without material delay to a third party under a "pass-through" arrangement; or
- The Company has transferred its rights to receive cash flows from the asset and either: (a) has transferred substantially all the risks and rewards of the asset; or (b) has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset.

Where the Company has transferred its rights to receive cash flows from an asset and has neither transferred nor retained substantially all the risks and rewards of the asset nor transferred control of the asset, the asset is recognised to the extent of the Company's continuing involvement in the asset. In that case, the Company recognises an associated liability. The transferred asset and the associated liability are measured on a basis that reflects the rights and obligations that the Company has retained. Continuing involvement that takes the form of a guarantee over the transferred asset is measured at the lower of the original carrying amount of the asset and the maximum amount of consideration that the Company could be required to repay.

Where continuing involvement takes the form of a written and/or purchased option on the transferred asset, the extent of the Company's continuing involvement is the amount of the transferred asset that the Company may repurchase, except that in the case of a written put option on an asset measured at fair value, the extent of the Company's continuing involvement is limited to the lower of the fair value of the transferred asset and the option exercise price.

On derecognition of a financial asset in its entirety, the differences between the carrying amount and the sum of: (a) the consideration received (including any new asset obtained less any new liability assumed); and (b) any cumulative gains or losses that have been recognised directly in other comprehensive income is recognised in profit or loss.

## 2.9 Impairment of financial assets

General ECL impairment model

The Company leverages the Nomura Group's models/parameters used for Basel reporting purposes, where feasible and available, with modifications to align to IFRS 9 requirements. Under this model, the ECL associated with a financial asset is typically a product of its probability of default ("PD"), loss given default ("LGD") and exposure at default ("EAD") discounted using the original effective interest rate to the reporting date.

- PD PDs are sourced from industry data and validated based on historical experience, incorporating forward-looking scenarios.
- LGD LGDs are determined by class of financial instrument based on historical experience of loss and recovery rates for similar financial instruments and other relevant industry data. Adjustments are made to reflect impact of collateral and integral credit enhancements.
- EAD EAD is based on the current gross carrying value of the financial instruments, with adjustments made for significant scheduled or potential repayment and drawdowns.

ECL models are subject to an independent assurance process, which is managed by the Risk Model Validation Group ("RMVG"), and are also reviewed regularly for its logic and conceptual soundness, together with the integrity of model inputs and outputs.

Assessment of significant increase in credit risk

Under the General ECL impairment model, determination of whether a significant increase in credit risk has occurred at each reporting date is primarily through observed changes in internal credit ratings between initial recognition and reporting date, which is more than prespecified thresholds.

Non-credit impaired exposures more than 30 days past due are considered to have experienced a significant increase in credit risk, and are transferred to Stage 2.

Exposures are transferred back to Stage 1 when they no longer meet the criteria for a significant increase in credit risk.

The Company considers "low credit risk" to meet all of the following criteria.

- Low default risk possess an investment grade credit rating using a combination of internal and external credit rating model;
- The obligor has a strong capacity in the short term to meet its obligations; and
- Expectations that adverse change in economic and business conditions will not necessary reduce the ability of the obligor to meet its obligations.

The Company applies low credit risk simplifications for cash balances with banks, reverse repurchase agreements and receivables from related companies. For the loans and advances carried at amortised cost, due to the low default history, days past due is used as backstop if there is a significant increase in credit risk.

#### 2.9 Impairment of financial assets (cont'd)

Definition of default for credit-impaired financial assets

Exposures are classified as Stage 3 if these are deemed to be credit-impaired or have demonstrated objective evidence of default as at the reporting date.

The Company uses the following criteria to determine whether there is evidence of default:

- Default or delinquency in interest or principal payments.
- Granting of a concession to existing contractual terms for economic or legal reasons relating to the borrower's financial difficulty.
- Bankruptcy filings, liquidation or other winding-up or cessation of business of an obligor or other similar situations.

Exposures which are 90 days or more past due are considered to be credit impaired, and are transferred to Stage 3.

Exposures that are credit-impaired are classified as Stage 3 and could be upgraded to Stage 1 or Stage 2 if supported by repayment capability, cash flows and financial position of the borrower and it is unlikely that the exposure will be classified again as credit-impaired in the future.

#### Expected Life

When measuring Stage 2 or 3 ECL, cash flows over the expected remaining life of the financial asset are considered. The expected life for this purpose is the maximum contractual period over which the Company is exposed to credit risk from the financial instrument.

#### Governance framework

ECL models are subject to an independent assurance process, which is managed by the Risk Model Validation Group ("RMVG"), and are also reviewed regularly. This assurance process covers the review of the underlying ECL methodology including its logic and conceptual soundness, together with the integrity of model inputs and outputs.

# Simplified ECL impairment model

Simplified ECL impairment model is applied to trade receivables, other receivables and other assets.

#### 2.10 Financial liabilities

Initial recognition and measurement

Financial liabilities are recognised when, and only when, the Company becomes a party to the contractual provisions of the financial instrument. In addition, they are not generally recognised unless one of the parties has performed or the contract is a derivative contract not exempted from the scope of IFRS 9. The Company determines the classification of its financial liabilities at initial recognition.

All financial liabilities are recognised initially at fair value plus in the case of financial liabilities not at fair value through profit or loss, directly attributable transaction costs.

#### Subsequent measurement

The subsequent measurement of financial liabilities depends on their classifications as follows:

#### (a) Financial liabilities at fair value through profit or loss

Financial liabilities at fair value through profit or loss include financial liabilities held-for-trading and financial liabilities designated at fair value through profit or loss. Financial liabilities are classified as held-for-trading if they are acquired for the purpose of selling in the near term. This category includes derivative financial instruments entered into by the Company that are not designated as hedging instruments in hedge relationships. Separated embedded derivatives are also classified as held-for-trading unless they are designated as effective hedging instruments. Financial liabilities designated at fair value through profit or loss includes structured notes issued by the company which are risk managed on a fair value basis as it includes embedded derivatives.

Subsequent to initial recognition, financial liabilities at fair value through profit or loss are measured at fair value. Any gains or losses arising from changes in fair value of the financial liabilities are recognised in profit or loss. Any gains or losses arising from changes in own credit risk of notes issued are recognised in the other comprehensive income.

#### (b) Financial liabilities at amortised cost

After initial recognition, financial liabilities that are not carried at fair value through profit or loss are subsequently measured at amortised cost using the effective interest method. Gains and losses are recognised in profit or loss when the liabilities are derecognised, and through the amortisation process.

#### 2.10 Financial liabilities (cont'd)

#### De-recognition

A financial liability is de-recognised when the obligation under the liability is discharged, cancelled or expires. When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as a de-recognition of the original liability and the recognition of a new liability. The difference between the carrying value of the original financial liability and the consideration is recognised in profit or loss. However, the own credit risk of notes issued is not allowed to be recycled to profit or loss upon derecognition.

#### 2.11 Offsetting of financial instruments

Financial assets and financial liabilities are offset and the net amount is presented in the balance sheet, when and only when, there is a currently enforceable legal right to set-off the recognised amounts and there is an intention to settle on a net basis, or to realise the assets and settle the liabilities simultaneously.

Amounts due to/due from counterparties are only netted if there is a legal right to offset and management intends to settle on a net basis, or to realise an asset and settle the liability simultaneously. At present, no transactions meet these criteria and no amounts due to/due from by counterparties have been netted.

## 2.12 Provisions

Provisions are recognised when the Company has a present obligation (legal or constructive) as a result of a past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and the amount of the obligation can be estimated reliably.

Provisions are reviewed at the end of each reporting period and adjusted to reflect the current best estimate. If it is no longer probable that an outflow of economic resources will be required to settle the obligation, the provisions are reversed. If the effect of the time value of money is material, provisions are discounted using a current pre-tax rate that reflects, where appropriate, the risks specific to the liability. When discounting is used, the increase in the provisions due to the passage of time is recognised as a finance cost.

#### 2.13 Revenue

Revenue is recognised to the extent that it is probable that the economic benefits will flow to the Company and the revenue can be reliably measured, regardless of when the payment is made. Revenue is measured at the fair value of consideration received or receivable, taking into account contractually defined terms of payment and excluding taxes or duty. The following specific recognition criteria must also be met before revenue is recognised:

#### (a) Interest income

Interest income is recognised on a time proportion basis using the effective interest rate which is the rate that exactly discounts the estimated future cash receipts through the expected life of the financial instruments or a shorter period, where appropriate, to the net carrying amount of the financial assets or liabilities.

#### (b) Other income

Other income includes service fee income performed on behalf of related companies over time.

# (c) Net losses from trading activities

Net losses from trading activities include gains and losses from changes in fair value of financial assets and liabilities designated at fair value through profit or loss and derivative financial assets and liabilities.

#### 2.14 Taxes

# (a) Current income tax

Current income tax assets and liabilities for the current and prior periods are measured at the amount expected to be recovered from or paid to the taxation authorities. The tax rates and tax laws used to compute the amount are those that are enacted or substantively enacted at the end of the reporting period.

Current income taxes are recognised in profit or loss except to the extent that the tax relates to items recognised outside profit or loss, either in other comprehensive income or directly in equity.

# 2.14 Taxes (cont'd)

# (b) Deferred tax

Deferred tax is provided using the liability method on temporary differences at the end of the reporting period between the tax bases of assets and liabilities and their carrying amount for financial reporting purposes.

Deferred tax liabilities are recognised for all temporary differences, except:

- where the deferred tax liability arises from the initial recognition of goodwill
  or of an asset or liability in a transaction that is not a business combination
  and, at the time of the transaction, affects neither the accounting profit nor
  taxable profit or loss; and
- in respect of taxable temporary differences associated with investments in subsidiaries, associates and interests in joint ventures, where the timing of the reversal of the temporary differences can be controlled and it is probable that the temporary differences will not reverse in the foreseeable future.

Deferred tax assets are recognised for all deductible temporary differences, carry forward of unused tax credits and unused tax losses, to the extent that it is probable that taxable profit will be available against which the deductible temporary differences and the carry forward of unused tax credits and unused tax losses can be utilised except:

where the deferred tax asset relating to the deductible temporary differences arises from the initial recognition of an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable profit or loss.

The carrying amount of deferred tax asset is reviewed at the end of each reporting period and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred tax asset to be utilised. Unrecognised deferred tax assets are reassessed at the end of each reporting period and are recognised to the extent that it has become probable that future taxable profit will allow the deferred tax asset to be recovered.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply to the financial period when the asset is realised or the liability is settled, based on tax rates and tax laws that have been enacted or substantively enacted at the end of the reporting period.

Deferred tax relating to items recognised outside profit or loss is recognised outside profit or loss. Deferred tax items are recognised in correlation to the underlying transaction either in other comprehensive income or directly in equity.

Deferred tax assets and deferred tax liabilities are offset, if a legally enforceable right exists to set-off current income tax assets against current income tax liabilities and the deferred taxes relate to the same taxable entity and the same taxation authority.

# 2.15 Employee benefits

(a) Defined contribution plan

As required by law in Singapore, the Company makes contribution to the state retirement scheme, the Central Provident Fund ("CPF"), a defined contribution pension scheme. These contributions are recognised as an expense in the period in which the related service is performed.

(b) Employee leave entitlement

Employee entitlements to annual leave are recognised when they are accrued to employees. A provision is made for the estimated liability for leave as a result of services rendered by employees up to the end of the reporting period.

#### 2.16 Related parties

A related party is defined as follows:

- (a) A person or a close member of that person's family is related to the Company if that person:
  - (i) Has control or joint control over the Company;
  - (ii) Has significant influence over the Company; or
  - (iii) Is a member of the key management personnel of the Company or of a parent of the Company.
- (b) An entity is related to the Company if any of the following conditions applies:
  - The entity and the Company are members of the same group (which means that each parent, subsidiary and fellow subsidiary is related to the others);
  - (ii) One entity is an associate or joint venture of the other entity (or an associate or joint venture of a member of a group of which the other entity is a member):
  - (iii) Both entities are joint ventures of the same third party;
  - (iv) One entity is a joint venture of a third entity and the other entity is an associate of the third entity;
  - (v) The entity is a post-employment benefit plan for the benefit of employees of either the Company or an entity related to the Company. If the Company is itself such a plan, the sponsoring employers are also related to the Company;
  - (vi) The entity is controlled or jointly controlled by a person identified in (a);
  - (vii) A person identified in (a) (i) has significant influence over the entity or is a member of the key management personnel of the entity (or of a parent of the entity); or
  - (viii) The entity, or any member of a group of which it is a part, provides key management personnel services to the reporting entity or to the parent of the reporting entity.

#### 2.17 Interest rate benchmark reform

In March 2021, the UK Financial Conduct Authority (FCA) announced the dates on which LIBOR would be discontinued. All GBP, CHF, EUR and JPY London Interbank Offered Rate (LIBOR) settings and the one-week and two-month USD LIBOR settings would lose representativeness or discontinue after 31 December 2021. The remaining USD LIBOR settings would lose representativeness or discontinue after 30 June 2023.

During the year, the Company has completed the transition of the IBOR exposures to RFRs and is currently working on the remaining transitions for those IBOR referenced rates that has yet to cease as shown in the table below. The migration of the existing IBOR positions will be validated by the various workstreams. In addition, migrations for existing IBOR positions are being performed with the involvement of multiple departments across the Nomura Group.

The Company continued to engage the counterparties that had not adhered to the International Swaps and Derivatives Association ("ISDA") 2020 IBOR Fallbacks Protocol to negotiate remediation of USD LIBOR contracts by end of June 2023.

The amounts in the below table provides an indication of the extent of the Company's exposure to the IBOR benchmarks that are due to be replaced at the end of March 2023. Amounts are in respect of financial instruments that:

- (a) contractually reference an interest rate benchmark that is planned to transition to an alternative benchmark;
- (b) have a contractual maturity beyond the date by which the reference interest rate benchmark is expected to cease; and
- (c) are recognised on the Company's balance sheet.

	USD LIBOR USD'000
Financial assets designated at fair value through profit or loss	25,192
Financial liabilities designated at fair value through profit or loss	898,721
Derivative notional contract amount	4,361,221

#### 3. Interest income

	<b>2023</b> USD'000	<b>2022</b> USD'000
Loans due from related companies Placements with related companies Interest from bank balance	349,071 65,220 9,804	161,025 1,450 310
	424,095	162,785

Total interest income (calculated using effective interest rate) for financial assets that are measured at amortised cost is USD424,095,000 (2022: USD162,785,000).

# 4. Net losses from trading activities

	<b>2023</b> USD'000	<b>2022</b> USD'000
Derivative financial instruments Financial liabilities designated at fair value through	(1,586,955)	(1,857,367)
profit or loss	1,178,806	1,706,544
	(408,149)	(150,823)

Interest expense on financial liabilities designated at fair value through profit or loss is USD183,000,000 (2022: USD241,000,000).

# 5. Other income

	<b>2023</b> USD'000	<b>2022</b> USD'000
Service fees income	4,540	3,955
	4,540	3,955

#### 6. Staff costs

	<b>2023</b> USD'000	<b>2022</b> USD'000
Salaries, wages, bonuses and other staff related expenses Defined contribution plan	104 9	133 12
	113	145

# 7. Other operating expenses

	<b>2023</b> USD'000	<b>2022</b> USD'000
Guarantee fees payable	5,343	5,843
Service fees paid	2,870	2,590
Legal and professional fees	25	446
Other expenses	698	764
Sales and withholding tax	7,094	278
Transfer pricing expense	48,821	5,495
	64,851	15,416

# 8. Allowance for expected credit losses

	<b>2023</b> USD'000	<b>2022</b> USD'000
Stage 1 ECL allowance		
Loans (Note 12)	2,518	2,091
	2,518	2,091

The table below shows the movement in allowance for ECL during the year:

	Balance at 1 April 2022 USD'000	Charge to income statement USD'000	Balance at 31 March 2023 USD'000
Loans	2,091	427	2,518
	2,091	427	2,518
	Balance at 1 April 2021 USD'000	Charge to income statement USD'000	Balance at 31 March 2022 USD'000
Loans	1,598	493	2,091
	1,598	493	2,091

The ECL balance above relates to loans which are classified as Stage 1 under IFRS 9. These loans are not past due and are collectively assessed for impairment. There was no movement between ECL stages during the year. The increase in ECL was solely driven by the increase in carrying value of loan balances as at year end. As these loans due from related companies which are relatively short term in nature, the ECL is not expected to be significant.

# 9. Taxation

# (a) Major components of income tax expense

The major components of income tax expense for the years ended 31 March 2023 and 2022 are:

	<b>2023</b> USD'000	<b>2022</b> USD'000
Current income tax	-	-
Deferred income tax		
<ul> <li>Original and reversal of temporary differences</li> </ul>	(6,603)	(28)
	(6,603)	(28)

# (b) Relationship between tax expense and accounting loss

The reconciliation between the tax expense and the product of accounting loss multiplied by the applicable tax rate for the financial years ended 31 March 2023 and 2022 is as follows:

	<b>2023</b> USD'000	<b>2022</b> USD'000
Loss before taxation	(46,230)	(234)
Tax at applicable statutory tax rate at 17% (2022: 17%)	(7,859)	(40)
Adjustments:		
Withholding tax Others	1,206 50	47 (35)
	(6,603)	(28)

# (c) Deferred tax asset/ liability

	<b>2023</b> USD'000	<b>2022</b> USD'000
At beginning of year	515	46,676
Movement to profit or loss	6,603	28
Movement through OCI	(48,412)	(46,189)
Total deferred tax (liability)/asset	(41,294)	515

The deferred tax asset relates to the current year's tax losses. The deferred tax liability relates to gains on own credit, of which \$48,412,000 (2022: \$46,189,000) are taken to other comprehensive income.

# 10. Cash and cash equivalents

	<b>2023</b> USD'000	<b>2022</b> USD'000
Cash balances with banks	423,427	224,344

Cash balances with banks earn interest at prevailing deposit rates.

#### 11. Financial assets designated at fair value through profit or loss

The financial assets are fully funded over-the-counter ("OTC") equity options that are held for trading entered into with related companies, Nomura Securities Bermuda, it matures on June 2026. The notional value at the year ended was USD53,700,000 (2022: USD53,700,000). Fair value changes arising from changes in credit risk as at 31 March 2023 and 31 March 2022 were not significant.

#### 12. Loans

	<b>2023</b> USD'000	<b>2022</b> USD'000
Loans Reverse repurchase agreement Less: Allowance for impairment (Note 8)	8,983,185 922 (2,518)	9,242,494 - (2,091)
	8,981,589	9,240,403
	6.65.139.41	76.564.00

Loans are unsecured, bear interest at various 1 and 3 month interbank offer rate plus market related spread. Loans have maturities ranging from April 2023 to April 2024.

Reverse repurchase agreement at amortised cost bear interest at 0.25% and has a maturity on June 2025. A USD Treasury note is accepted as collateral as part of this reverse repurchase which the Company is permitted to sell or repledge under standard market documentation. The fair value of financial assets accepted as collateral that the Company is permitted to sell or repledge in the absence of default is USD 922,000.

#### 13. Other assets

	<b>2023</b> USD'000	<b>2022</b> USD'000
Collateral placed	2,004,592	1,340,697
Trade receivables	79,282	105,144
Interest receivable	86,683	19,118
Other receivables	1,361	1,502
Tax receivable	16	38
	2,171,934	1,466,499

Trade and other receivables are unsecured, non-interest bearing and are due to settle within the next 12 months.

Collateral placed are unsecured, bear interest at US Federal Funds Rate and repayable within 30 days.

#### 14. Other liabilities

<b>2023</b> USD'000	<b>2022</b> USD'000
13,538	18,401
5,406	5,438
6,787	2,603
2,907	6,083
=	26
28,638	32,551
	USD'000 13,538 5,406 6,787 2,907

Guarantee fee payables are paid to Nomura Holdings Inc. ("NHI"), Nomura Securities Co. ("NSC") and Nomura International ("Hong Kong") Limited ("NIHK") for the guarantee provided on the notes issued by the Company,

#### 15. Financial liabilities designated at fair value through profit or loss

	<b>2023</b> USD'000	<b>2022</b> USD'000
Notes in issue, by remaining maturity: - Less than 5 years - Greater than 5 years	4,414,940 4,419,381	3,974,766 5,249,466
	8,834,321	9,224,232

The notes in issue above are designated at fair value through profit or loss comprised structured notes with maturity dates ranging from April 2023 to December 2067 (2022: April 2022 to December 2067). The structured notes issued by the Company are managed together with the derivative financial instruments on a fair value basis. The impact of fair value changes in own credit risk recorded on the balance sheet as at 31 March 2023 was a pre-tax gain of USD317,745,000 (2022: pre-tax gain of USD35,711,000). The notes are guaranteed by either a related company, Nomura Securities Co Ltd ("NSC"), the holding company, Nomura Holdings Inc ("NHI") or a joint guarantee with a related company, Nomura International Hong Kong ("NIHK") and NHI.

# 16. Related parties transactions

Other than those disclosed elsewhere in the financial statements, the Company had the following significant transactions with related companies which were made in the ordinary course of their business at terms agreed between the parties:

2023	Ultimate holding company USD'000	Related companies USD'000
Net income/(expense)		3. 315.53
Interest income	-	414,291
Losses from trading activities	-	(1,502,301)

The holders of ordinary shares are entitled to receive dividends as and when declared by the Company. All ordinary shares carry one vote per share without restrictions. The ordinary shares have no par value.

#### 18. Financial risk management

# Financial risk management objectives and policies

The Company is exposed to a variety of financial risks, including the effects of changes in foreign exchange rates, interest rates, credit risk and liquidity risk.

Managing these financial risks forms an integral part of the Company's business. The Company's risk management policy encompasses a variety of controls and reporting processes. These include the parameters for the risks that the Company may undertake for the various financial instruments, guidelines for accepting customers and the terms under which customer business is conducted. The Company believes it has effective processes in place to identify, measure, monitor and mitigate these financial risks.

The Executive Management Committee ("EMC") is responsible for the development and oversight of the business strategies and policies, and to ensure the corporate objectives of the company are achieved.

#### (a) Market risk

Market risk is the risk of loss arising from fluctuations in the value of assets and liabilities (including off-balance sheet items) due to fluctuations in market risk factors (interest rates, foreign exchange rates, prices of securities and others).

#### (i) Market risk management process

Effective management of market risk requires the ability to analyse a complex and constantly changing global market environment, identify problematic trends and ensure that appropriate action is taken in a timely manner.

The Company uses a variety of complementary tools to measure, model and aggregate market risk. The Company's principal statistical measurement tool to assess and monitor market risk on an ongoing basis is Value at Risk ("VaR"). Limits on VaR are set in line with Group's risk appetite as expressed through economic capital. In addition to VaR, the Company uses sensitivity analysis and stress testing to measure and analyse its market risk. Sensitivities are measures used to show the potential changes to a portfolio due to standard moves in market risk factors. They are specific to each asset class and cannot usually be aggregated across risk factors. Stress testing enables the Company to analyse portfolio risks or tail risks, including non-linear behaviours and can be aggregated across risk factors at any level of the group hierarchy. Market risk is monitored against a set of approved limits, with daily reports and other management information provided to the business units and senior management.

The Company enters into derivative financial instruments with Nomura affiliates to hedge the underlying market risk such as currency risk, interest rate risk, and other price risk of its positions.

# 18. Financial risk management (cont'd)

# Financial risk management objectives and policies (cont'd)

#### (a) Market risk (cont'd)

#### (ii) Value at risk

VaR is a measure of the potential loss in the value of positions due to adverse movements in markets over a defined time horizon with a specified confidence level. Market risks that are incorporated in the VaR model include equity prices, interest rates, foreign exchange rates, and commodities with associated volatilities and correlations.

#### (iii) VaR methodology assumptions

The Company uses a single VaR model which has been implemented globally in order to determine the total VaR for the Company. The Company's VaR methodology uses historical simulation to estimate potential profit or loss. Historical market moves are repeatedly applied to current exposure, forming a distribution of simulated portfolio returns. From this distribution the required potential losses can be estimated at required confidence levels or probabilities. VaR is calculated at a 95% (2022: 95%) confidence level and using a 1-day time horizon.

The VaR model uses a default historical time window of two years (520 business days). For risk management and VaR backtesting, the Company uses a weighted VaR. For the calculation of VaR, the probability weight assigned to each measure of estimated profit or loss in the historical simulation scenarios depends on when it occurred. The older the observation, the lower the weight.

In addition, the Company calculates other measures used to complement VaR under regulation known as "Basel 2.5". One example is Stressed-VaR ("SVaR") which is calibrated using a one-year window during a period of financial stress. The SVaR calculation uses one year of market data from that period of financial stress. The one-year window is calibrated to be the one with the largest SVaR, given the Company's current portfolio. The historical data used for SVaR is not exponentially weighted. All VaR and SVaR numbers are calculated within the same system using equivalent model assumptions.

The Company's VaR model uses time series for each individual underlying, whenever available. Whenever a time series cannot be found for a specific underlying, the VaR model will follow a 'proxy logic' to map the exposure to an appropriate time series (for example, this would be the case for an option on a recently issued stock). The level of proxying taking place in the VaR model is carefully monitored through internal risk management processes and there is a continual effort to source new time series to use in the VaR calculation.

#### 18. Financial risk management (cont'd)

#### Financial risk management objectives and policies (cont'd)

# (a) Market risk (cont'd).

#### (iv) VaR backtesting

The performance of the Company's VaR model is constantly monitored to ensure that it remains fit for purpose. The main approach for validating VaR is to compare 1-day trading losses with the corresponding VaR estimate. The VaR model is backtested at the Group level and backtesting results are reviewed on a monthly basis by Group Risk Management.

#### (v) Limitations and advantages of VaR

The main advantage of VaR as a risk measure is that it is able to aggregate risk from different asset classes (in contrast with other risk measures sensitivities that cannot be easily aggregated directly). The risk from different divisions of the Company can therefore easily be compared and aggregated using VaR.

As a risk measure, however, VaR has certain limitations. One of the main disadvantages with VaR is that it is a backward-looking risk measure. Using historical market moves to estimate future profits or losses assumes that only events that have actually happened in the past are relevant to analyse the risk of a portfolio.

In addition, VaR only gives an estimate of the loss at a stated 95th percentile (i.e. in 5 out of 100 days the loss will be greater than 1-day VaR), but not what the magnitude of loss could be whenever the loss does exceed VaR.

VaR as a risk measure is most appropriate for liquid markets and may understate the financial impact of severe events for which there is no historical precedent on where market liquidity may not be reliable. In particular, historical correlations can break down in extreme markets leading to unexpected relative market moves. This may make positions that off-set each other in VaR modelling move in the same direction thus increasing losses.

Given the limitations of the VaR model, the Group uses VaR only as one component of a diverse market risk management process. Other metrics to supplement VaR include stress VAR, 10d Worst Loss, economic capital, stress testing and sensitivity analysis.

# (vi) VaR metrics

The one-day VaR at 95% confidence level as of 31 March 2023 (95% as of 31 March 2022) indicated is as follows:

	<b>2023</b> USD'000	<b>2022</b> USD'000
VaR	201	208

#### 18. Financial risk management (cont'd)

# Financial risk management objectives and policies (cont'd)

# (a) Market risk (cont'd)

# (vii) Stress testing

The Company conducts market risk stress testing since VaR and sensitivity analysis have limited ability to capture all portfolio risks or tail risks, including non-linear behaviours. Stress testing for market risk is conducted daily and weekly, using various scenarios based upon features of trading strategies. The Company conducts stress testing for each desk and at the Company level. The stress testing scenarios are calibrated each year and additional scenarios may be added on changing market events.

# (b) Liquidity risk

Liquidity risk is the risk that the Company will encounter difficulty in raising funds to meet its working capital requirements and commitments for the loans, including that associated with financial instruments. This risk could arise from various scenarios and could be due both to Nomura specific and market wide events. The primary objective for liquidity risk management is to ensure continuous liquidity across market cycles and periods of market stress, and to ensure that all funding requirements and unsecured debt obligations that fall due within one year can be met without any reliance on additional unsecured funding or forced liquidation of assets.

Nomura Group's Maximum Cumulative Outflow ("MCO") model quantifies the amount of liquidity required to survive approved stress scenarios and controls liquidity usage via an unsecured funding limit framework. To ensure a readily available source of liquidity to meet the modelled liquidity requirements, including the Companies maturing liabilities, Nomura Group maintains a liquidity pool in the form of cash and highly liquid unencumbered securities that can readily be sold or pledged, of which the guarantor may utilise for any liquidity shortfall.

The Company places its cash with related companies of the Nomura Group through short term loans and is managed as a part of the overall Nomura Group liquidity as described above.

## Financial risk management objectives and policies (cont'd)

## (b) Liquidity risk (cont'd)

The table below presents the breakdown of the assets and liabilities by remaining contractual maturities at the balance sheet date. The amounts disclosed in the table are the carrying values. The amounts reflected under "due within 1 year" represent current assets and liabilities in accordance with IAS 1.

The loans to the related parties are of short-term nature and are normally rolled forward upon maturity.

### Financial risk management objectives and policies (cont'd)

## (b) Liquidity risk (cont'd)

The table below presents the cash flows payable under financial liabilities by remaining contractual maturities at the balance sheet date. The amounts disclosed in the table are the contractual undiscounted cash flows.

Derivative financial instruments are included in the "within 3 months" column at their fair value as liquidity risk on these items is not managed on the basis of contractual maturity and will frequently be settled before contractual maturity. Financial liabilities designated at fair value are disclosed based on the contractual maturity remaining.

2023	Within 3 months USD'000	3 to 12 months USD'000	Over 1 year USD'000	Over 5 years USD'000	Total USD'000

### Financial risk management objectives and policies (cont'd)

### (c) Credit risk

Credit risk is the risk of loss that may arise on outstanding financial instruments should a counterparty default on its obligations.

At the end of the reporting period, the Company's maximum exposure to credit risk was represented by the carrying amount of the financial assets that were recognised in the balance sheet.

The Company transacts primarily with other Nomura affiliates and its exposure to credit risks is that of the holding company, Nomura Holdings Inc's credit risk. Credit risk is managed by the ultimate holding company as part of the operations of the Group.

### Concentration of credit risk

Due to the Company's approach to mitigating risk, it is not exposed to any significant concentration risk other than that from other Nomura Group companies. Approximately 73% (2022: 70%) of the loans is with Nomura Europe Finance N.V. which is part of the Nomura Group.

### (d) Derivative financial instruments

Credit risk arising from derivative financial instruments is, at any time, limited to those with positive fair value, as recorded in the balance sheet. Derivative financial instruments are entered with related subsidiary companies for hedging purposes. The Company does not apply hedge accounting.

The tables below analyse the contractual or underlying principal amounts of derivative financial instruments held or issued for trading purposes.

They also set out the corresponding gross positive and negative balance sheet fair value of the trading derivative financial instruments.

### 19. Fair value of financial instruments

### (a) Fair value hierarchy

The Company classifies fair value measurements using a fair value hierarchy that reflects the significance of the inputs used in making the measurements. The fair value hierarchy has the following levels:

- Level 1 Quoted prices unadjusted in active markets for identical assets or liabilities;
- Level 2 Inputs other than quoted prices included within Level 1 that are observable for the assets or liabilities, either directly (i.e. as prices) or indirectly (i.e. derived from prices); and
- Level 3 Inputs for the assets or liabilities that are not based on observable market data (i.e. unobservable inputs).

Fair value measurements that use inputs of different hierarchy levels are categorised in its entirety in the same level of the fair value hierarchy as the lowest level input that is significant to the entire measurement.

The following table shows an analysis of financial instruments carried at fair value by level of fair value hierarchy:

2023	Level 1 USD'000	Level 2 USD'000	Level 3 USD'000	Total USD'000

Financial assets and financial liabilities not carried at fair value

Except for financial instruments disclosed above, the carrying values of assets and liabilities approximate their respective fair values, either because of the relatively short-term maturity or because the interest rates are generally reset after a short period of time.

### Valuation processes

The Company is fully integrated into the Nomura Group's governance framework which mandates determination or validation of a fair value measurement by control and support functions independent of the businesses assuming the risk of the financial instrument in order to ensure the appropriateness of any fair value measurement of a financial instrument used within these financial statements including those classified as Level 3 within the fair value hierarchy.

### (a) Fair value hierarchy (cont'd)

Valuation processes (cont'd)

The functions for either defining, implementing or maintaining valuation policies and procedures are as follows:

- The Valuation Control Group ("VCG") within Nomura's Finance Department has the primary responsibility to determine and implement valuation policies and procedures in connection with determination of fair value measurements. VCG performs independent price verification to verify the appropriateness of fair value measurements applied to all financial instruments. The independent price verification process seeks to ensure the valuation technique and inputs are appropriate, reasonable and consistently applied.
- The Valuation Control Model Validation Group ("VCMVG") is an independent function at the global level to validate the appropriateness and perform governance and oversight for all models developed and built by the Valuation Control Group ("VCG"). The valuation technique of the OCA model as disclosed in Note 2.4 was validated and approved by VCMVG.
- The Valuation Model Validation Group ("VMVG") validates the appropriateness and consistency of pricing models used to determine fair value measurements independently of those who design and build the models.

### (b) Level 2 fair value measurements

Management considered a threshold of 10% movement in the related unobservable parameters against the fair value movement, performed via a sensitivity analysis, to determine if it is significant overall to the inputs used for the position.

The following is a description of the valuation techniques and inputs used in the fair value measurement for assets and liabilities that are categorised within Level 2 of the fair value hierarchy:

(i) Financial assets and liabilities designated at fair value through profit or loss

Financial assets and liabilities designated at fair value through profit and loss are measured at fair value by reference to quoted prices when available. Valuation models are based wherever possible on assumptions supported by observable market prices or rates. These valuation techniques include discounted cash flows ("DCF") and option pricing models, depending on the nature of the embedded features within the financial instruments. As a result, fair value calculated using these valuation techniques will change if the underlying assumptions change. The fair value of the financial liabilities designated at fair value through profit or loss includes Nomura's own credit worthiness.

#### (ii) Derivatives

Derivative products valued using a valuation technique with marketobservable inputs are mainly interest rate swaps and options, currency swaps and forward foreign exchange contracts. The most frequently applied valuation technique is discounted cash flow model.

## (c) Level 3 fair value measurements

(i) Information about significant unobservable inputs used in Level 3 fair value measurements

The following table shows the information about fair value measurements using significant unobservable inputs (Level 3):

Description	Fair value as at 31 March 2023 USD'000	Valuation techniques	Unobservable inputs	Range
Credit default swaps	(75,315)	Discounted cash flow	Correlation	99.05% to (54.00)%
Equity options	(168,716)	Discounted cash flow/option model	Correlation	73.50% to (80.74)%
Foreign exchange options	(15,039)	Discounted cash flow/option model	Correlation	99.79% to (35.00)%
Interest rate options	(221,835)	Discounted cash flow/option model	Correlation	99.08% to (72.00)%
Interest rate swaps	(31,571)	Discounted cash flow	Correlation	95.96% to (25.00)%

# (c) Level 3 fair value measurements (cont'd)

(i) Information about significant unobservable inputs used in Level 3 fair value measurements (cont'd)

Description	Fair value as at 31 March 2022 USD'000	Valuation techniques	Unobservable inputs	Range
Credit default swaps	(53,875)	Discounted cash flow	Correlation	98.99% to (98.00)%
Equity options	(168,284)	Discounted cash flow/option model	Correlation	66.54% to (69.00)%
Foreign exchange options	(11,877)	Discounted cash flow/option model	Correlation	99.77% to (50.00)%
Interest rate options	(136,306)	Discounted cash flow/option model	Correlation	98.51% to (53.00)%
Interest rate swaps	(23,417)	Discounted cash flow	Correlation	93.43% to (38.00)%

### (c) Level 3 fair value measurements (cont'd)

 Information about significant unobservable inputs used in Level 3 fair value measurements (cont'd)

Impact on fair value of Level 3 financial instruments measured at fair value of changes to key assumptions

Credit default swap - a 1% movement in correlation could result in a profit or loss of USD250,000

Foreign exchange option - a 1% movement in correlation could result in a profit or loss of USD71,000.

Equity option - a 1% movement in the correlation could result in a profit or loss of USD376,000.

Interest rate swap - a 1% movement in correlation could result in a profit or loss of USD219,000.

Interest rate option - a 1% movement in correlation could result in a profit or loss of USD662,000.

For each class of financial instrument described in the above table, changes in each of the significant unobservable inputs and assumptions used by the Company will impact upon the determination of a fair value measurement for the financial instrument.

As the Company enters into derivative transactions to hedge the risk in the embedded derivatives associated risk exposures and the market risks in loans, the increase or decrease in the value of the Level 3 inputs or assumptions have material impact on its profit and loss. Hedging derivative instruments offset the positions arising from the derivatives which are embedded in the debt instruments and limit the sensitivity of fair value to changes in unobservable inputs related to these financial instruments.

### (c) Level 3 fair value measurements (cont'd)

(ii) Movements in Level 3 financial instruments measured at fair value

Assets and liabilities move between Level 2 and Level 3 primarily when there is an increase or decrease in market activity related to an unobservable input, or a change in the significance of the unobservable input, with instruments classified as Level 3 if an unobservable input is deemed significant. The transfers occurred at the beginning of the reporting period.

The following table shows a reconciliation of the opening and closing amounts of Level 3 financial liabilities which are recorded at fair value:

Financial assets:  Derivative financial instruments  Foreign exchange	At 1 April 2022 USD'000	Transfers in USD'000	Transfers out USD'000	Settlement s USD'000	(losses) in profit or loss USD'000	At 31 March 2023 USD'000

## (iii) Valuation techniques

Derivatives are valued using internal models using market transactions and other market evidence whenever possible, including market-based inputs to models, model calibration to market clearing transactions, or alternative pricing sources with reasonable levels of price transparency. Valuation techniques include discounted cash flow techniques and option pricing models. Derivatives that are valued using models with significant unobservable inputs such as correlation, long-dated volatility, or other unobservable inputs are classified within Level 3.

### (c) Level 3 fair value measurements (cont'd)

(iii) Valuation techniques (cont'd)

Valuation techniques may rely on parameters which are not observable in the market due to an absence of equivalent, current, market transactions or observable market data. These valuation techniques are based on assumptions. As a result, the fair value calculated using these valuation techniques will change if the underlying assumptions change.

### 20. Capital management

The objective of the Company's capital management is to safeguard its ability to continue as a going concern so that it can continue to manage the financing needs and liquidity position of the Nomura Group. In order to maintain or achieve an optimal capital structure, the Company may adjust, in light of changes in economic conditions, the amounts of dividend payment and capital return to shareholders.

The capital structure of the Company comprised the notes issued, issued capital and reserves as disclosed in the statement of changes in equity. Notes issued are guaranteed by NSC, NHI or a joint guarantee by NIHK and NHI.

The Company is not subject to externally imposed capital requirements.

#### 21. Authorisation of financial statements

The financial statements of the Company for the financial year ended 31 March 2023 were authorised for issue in accordance with a resolution of the directors on 26 July 2023.

# EY | Building a better working world

EY exists to build a better working world, helping to create long-term value for clients, people and society and build trust in the capital markets.

Enabled by data and technology, diverse EY teams in over 150 countries provide trust through assurance and help clients grow, transform and operate.

Working across assurance, consulting, law, strategy, tax and transactions, EY teams ask better questions to find new answers for the complex issues facing our world today.

EY refers to the global organization, and may refer to one or more, of the member firms of Ernst & Young Global Limited, each of which is a separate legal entity. Ernst & Young Global Limited, a UK company limited by guarantee, does not provide services to clients. Information about how EY collects and uses personal data and a description of the rights individuals have under data protection legislation are available via ey.com/privacy. EY member firms do not practice law where prohibited by local laws. For more information about our organization, please visit ey.com.
